“... employability has shifted from a focus on ‘job-getting’ towards the metacognitive capacity to adapt, lead and learn.”

Bennett, Knight, Divan, Kuchel, Horn, van Reyk,
da Silva. (2017). *Australian Journal of Career
Development.*

The Top 4 Reasons New Hires Fail Relate to Beyond-Disciplinary Skills:

- 1 Coachability (26%):** ability to accept and implement feedback
- 2 Emotional Intelligence (23%):** ability to understand & manage one's own emotions & recognize others'
- 3 Motivation (17%):** sufficient drive to achieve potential and excel in job
- 4 Temperament (15%):** attitude & personality suited to the job and work environment
- 5 Technical Competence (11%):** Functional and/or technical skills & knowledge required for the job

- 1 Coachability (26%):** ability to accept and implement feedback

STUDENT TRANSFORMATIVE LEARNING RECORD

UNIVERSITY OF CENTRAL OKLAHOMA

STLR is how UCO implements Transformative Learning.

Transformative Learning:

-  **Develops students' beyond-disciplinary skills**
-  **Expands students' perspectives of their relationships to self, others, community, and environment**

STLR is built around UCO's Central Tenets.

STLR Student Mobile Dashboard

The screenshot displays the STLR Student Mobile Dashboard. At the top, there is a navigation bar with "My Home" and "Select a course..." options, along with user information for Brenda Broncho. The main header features the UCO Learn@UCO logo and navigation links for "My Dashboard", "ePortfolio", "LOR", "Self Registration", and "D2L Help".

The dashboard is organized into several sections:

- STLR - Overall Progress:** A grid of five competency areas with their respective achievement counts:
 - Global and Cultural Competencies: Achieved 5
 - Health and Wellness: Achieved 9
 - Leadership: Achieved 7
 - Research, Creative and Scholarly Activities: Achieved 5
 - Service Learning and Civic Engagement: Achieved 3
- My Grades:** A list of courses with dropdown menus for each:
 - Minorities in American Society
 - Sociological Research
 - Biological Psychology
 - Comparative Psychology
 - Psychology of Sport
 - Beginning Archery
- Upcoming Dates:** A section for "WEEKLY OVERVIEW" showing the date range "Nov 01 - 07" with a notification badge of 4.

The STLR logo and the text "STUDENT TRANSFORMATIVE LEARNING RECORD" are visible at the bottom of the overall progress section.

Completed Mid-Grant Data

UCO Retention by STLR Engagement (First-Time Full-Time Freshmen, Fall 2015-Fall 2016)

Title III Target Group Semester GPA by STLR Engagement (N=1,464)

*Statistically significant at the 0.001 level. All confidence intervals and other statistical details are available in full report.

Civitas Analysis of STLR Retention Improvement

*For those students least likely to persist, engagement in STLR activities (in collaboration with other campus engagements) yields increases as high as 15.2% among students who are least likely to persist in the absence of STLR. Note: All results for this figure meet the $p \leq 0.05$ threshold for statistical significance. (N=2,807)

Assessment Level Frequencies (N=5,714)

What They're Saying...

Undergraduate student, veteran*:

"Coming from the outside world in... I kind of have a picture of what it's like [out there]. [Students] need something other than books in front of them to learn about what the world is like. And that is what STLR does, it gives them a picture of the world and what they can do to make it better. Or make themselves better. Or help other people make it better."

Recent graduate, College of Business*:

[This student] attended the STLR Melton Gallery event Central African Art Exhibit. Viewing the exhibit expanded his view of the world and culture through the presentation of multiple vantage points: "That was something that I learned that stuck with me so much ever since then... the different viewpoints on the world... the art itself and how they talked about how the artist used the world to portray their piece... In business for instance, when I'm in marketing, it's my job to look at engineering... it's my job to look at the customer's viewpoint, my boss' viewpoint... all of these different viewpoints. Just that artist's example of different viewpoints can be applied in so many other areas. There's a lot of things during that [exhibit] that really stuck with me."

Undergraduate history major*:

"The most important part about transformative learning is being able to see things differently from a different point-of-view perspective or seeing things in a way that you never thought were that way."

Dr. Lindsey Churchill, College of Liberal Arts, faculty mentor for STLR project, "Herland Sister Resources Documentary and Library":

"Students have told me that they really feel like they are making a difference in their community with this project. They have also told me that this project helped them listen. I think that impacted me the most. In this time it is more important than ever that we listen to one another, and this project has helped students see the importance of hearing other people's stories and giving them a place in the community."

Liliana Renteria Mendoza, Director, OKC Cultural Outreach & Diversity Strategies and key component in the Hispanic Success Initiative:

"I believe STLR has provided staff a framework that allows us to capture the learning that is occurring outside of the classroom and provides a way to capture the transformation that students are having as they reflect on and integrate all of their experiences, curricular and co-curricular."

Lance Haffner, Corporate Leadership Development, Patterson-UTI and STLR Employer Advisory Board member, on his mock interview with a STLR grad:

"I was impressed with the student's ability to apply lessons learned from one experience to another experience."

*STLR qualitative research IRB parameters protect student identities.

The purpose of this record is to provide a visual representation of this student's achievement in the University of Central Oklahoma's (UCO) Tenets of Transformative Learning. This student's educational experience at UCO has resulted in achievements at the exposure, integration or transformation level as indicated below. See the key on the back of this document for short descriptions of what these levels of learning indicate with regard to student knowledge and experience. These experiences have been assessed and validated by trained faculty and professional staff members at the University of Central Oklahoma.

Global and Cultural Competencies

Keen sense of cultural self and an identity as a global citizen has emerged.	Developing sense of cultural self; and relation to the global community.	Beginning awareness of cultural self; openness to learning.
--	--	---

Health and Wellness

A holistic view of health and wellness for self and community is articulated and practiced.	A developing holistic view; some application to self and community with some ability to evaluate own behavior.	Beginning awareness and understanding of health and wellness; initial attempts at personal change.
---	--	--

Leadership

Leadership knowledge and skill are applied effectively to community or campus issues.	Leadership is developing; knowledge and skills are applied at a basic to intermediate level.	Leadership skills are being tried out with increasing understanding.
---	--	--

Research Creative and Scholarly Activities

The "why" and the "how" of research and creation are grasped and show in work.	Relevant inquiry about research and creative process & skills are developing.	Skills in research and the creative process are developing; ideas are beginning to emerge.
--	---	--

Service Learning and Civic Engagement

Deep engagement in the community, both through learning and helping.	Awareness of community issues and the importance of engagement.	First experiences in volunteering and civic interest.
--	---	---

The Student Transformative Learning Record is an accurate reflection of the named student's transformative learning achievements at the University of Central Oklahoma. Information provided in the student's e-portfolio is not curated by the university and is therefore not an official representation of the student's work while enrolled at the university.

ACCREDITATION:

The University of Central Oklahoma is accredited by the Higher Learning Commission/North Central Association of Colleges and Schools as a bachelor's and master's degree granting institution.

Analytic Thinking Gets Vertical

Overview

December 2014, I accepted the offer to join in on an afternoon of climbing at Oklahoma City's local climbing gym, Rocktown. My life was changed, and I finally found an activity where I could pair my analytical and physical abilities in order to literally "problem solve" (climbing boulder problems). While I found an immediate interest in climbing, learning technique and understanding when to apply certain climbing methods provided to be areas of opportunities throughout my new interest. Over the last year, I have learned to utilize forethought, analyze the variables in front of me, and implement planning and strategy through my growth as a climber. Consistent practice has allowed me to utilize my competencies not only within my practice as a climber, but throughout my decision making and action planning in both my role as a student and worker.

Skills and Insights Gained

Analytical Thinking: Building my competency as a climber involves employing strong analytic skills. Before beginning any climb (indoor or outdoor), I look take a long detailed look at the route ahead of me. I study my variables: what type of rock is present, the different shape of holds, and the style of climbing. I must understand how long the route is, and what type of energy it will require in order to be climb effectively. Not until I am able to understand all variables of a climb, am I able to proceed confidently and strategically.

Planning and Strategy: As I enjoy trying challenging routes, it is rare I succeed on my first try. Sustained practice and planning goes in to many of the routes that I "project" (focus on specifically for a period of time). After analyzing the variables and understanding the obstacles I face on projected climb, I proceed to implement strategies that will provide for the best response. Many of the routes I choose take time; so being able to find adaptability and sustained efforts within my strategies has been learning area of key importance.

Enjoying a Challenge: Rock climbing is meant to be hard, and the more I find myself improving the more of a challenge I look for. Pursuing a hobby in rock climbing influenced me to recognize that I seek out challenges and opportunities for growth. Once I finish a route with a particular "grade" or difficulty, I begin to look for something that will present me with that next step. I find this personal attribute to not only be present in my interest in climbing, but in my choice of career and educational endeavors.

Lessons Learned

As I get older, I can only hope my body allows me to continue my climbing endeavors; however, the strengths mental strengths I have gained from my newest lifestyle choice have supplemented my personal growth as much as the physical components. Repetitive application of analytical thinking and planning and strategy through climbing has reinforced my ability to practice these behaviors throughout my studies, employment, and overall lifestyle decision-making.

As I have begun choosing graduate schools, these skills have prompted me to look at what variables will strengthen and weaken my perspective schools choices. I pay attention to cost/benefit, chance of long-term success, and any plausible obstructions in my path to graduate study. At work, I am better able to focus on the different variables that construct the problems I am presented with, in order to better understand the body of a situation. From there I am able to plan and execute the best strategy from an objective perspective.

Throughout my educations, analytical thinking has helped me develop research projects and design such as my research project regarding [Chivalry and Female Attractiveness](#) as well as combine classroom research to correct write my own [Duchenne Smile](#)

Graduates ready and motivated to solve societal challenges and who want to create, not simply consume

UNIVERSITY OF CENTRAL OKLAHOMA

Graduates ready and motivated to solve societal challenges and who want to create, not simply consume

COMMENCEMENT - FALL 2016

STUDENT TRANSFORMATIVE LEARNING RECORD (STLR)

Some Spring 2017 graduates will be wearing color-coded cords for achieving the highest level of transformation in one or more of five UCO tenets. These five tenets are represented as following: Global and Cultural Competencies (orange), Health and Wellness (green), Leadership (blue), Research, Creative and Scholarly Activities (magenta), and Service Learning and Civic Engagement (purple).

STLR is an award winning-concept, developed here at UCO and recognized by the U.S. Department of Education with a \$7.8 million grant. The program has gained national and international recognition for its ability to document student success with transformative learning that parallels an academic transcript, showing mastery in employability and citizenship skills.

Students build and enhance their record through submitting STLR-

tagged assignments, attending STLR-tagged campus events, serving in STLR-tagged student groups, and/or participating in outside-of-class projects. Their levels of achievements are assessed and validated by a UCO faculty or staff member.

Through STLR, students graduate with more than an academic degree. Students can show they've taken their education to a transformative level, gaining skills that can be applied in areas identified as being needed in today's workforce and in our metropolitan communities.

STLR Transformation graduates are recognized with STLR next to their name by major and by tenet on the next page.

Note: UCO's sixth tenet, Discipline Knowledge, is recognized by students completing their academic degrees.
