## **OKLAHOMA EDUCATIONAL INDICATORS PROJECT MEAN ACT COMPOSITE SCORE BY HIGH SCHOOL SITE**

### **Background**

With the passage of the "Oklahoma 2000 Education Challenge Act" in May of 1989, the state of Oklahoma affirmed a commitment to promoting excellence in the education of Oklahoma children. The act established requirements and programs designed to ensure that by the year 2000: all children will be ready to do first-grade schoolwork when they enroll in first grade; at least 90 percent of students entering first grade will ultimately graduate from high school; at least 50 percent of the graduates of each of Oklahoma's high schools will have demonstrated mastery as seniors at or above national average levels of accomplishment; and at least 80 percent of the graduates of each of Oklahoma's high schools will be fully prepared to begin college work.

The act also established that the State Board of Education publish annually a summary report of information provided by the Oklahoma Educational Indicators Project. The purpose of this program is to develop and implement a system of measures or indicators of educational performance. The act also mandated that the State Regents cooperate in the annual publication of this report. The State Regents, with the cooperation of the State Department of Education and other agencies, has participated in the development of indicators of comparative educational standing and accomplishment. The High School Indicators Project reports on: (1) ACT scores, (2) college-going rates, (3) college credit hours and GPA, and (4) remediation rates.

This Mean ACT Scores High School Indicators Project report provides the mean ACT scores of Oklahoma high school graduates. The ACT test is a measure of educational development. Performance on the test is influenced by the student's educational experiences, as the patterns of difference in average scores according to type of high school program clearly indicate. The ACT Corporation cautions against using the ACT test scores in isolation from other measures to infer the overall quality of schools and education within a state. Specifically, the ACT tests are designed to measure high school students' educational development as related to their readiness to pursue further study at the college level.

The ACT test-takers included in this report are those students taking the ACT who were in the 2000 graduating class. The ACT results for 2000 offer Oklahoma the opportunity for the ninth year to consider only test-takers who took the enhanced ACT exam. The mean ACT composite scores are reported by county, district, and high school site. For high schools with five or fewer ACT test-takers, an asterisk was entered in the mean ACT column in order to comply with the federal privacy act. A few high schools have a blank entry, which indicates that there were no ACT test-takers reported that year.

### **Methodology**

The State Regents compute the mean ACT composite score for Oklahoma and each individual high school site based on the *highest* test score of those 2000 graduates who took the ACT more than one time. ACT, Inc. calculates the mean ACT composite score on the *last* test score. Therefore, the computed mean ACT composite scores by OSRHE and ACT are not comparable. For example, 2000 high school graduates earned a mean ACT composite of 21.1 when calculated using the highest score and 20.8 when calculated using the last score.

The student's ACT score is attributed to the high school where the highest score was earned. If the high school code does not match an Oklahoma high school, then other test dates are searched for a valid high school code. If no match is found for an Oklahoma resident, then the score is excluded from the report.

### **Summary of Results**

The summary table of 2000 high school graduate mean ACT scores is by county. The mean is based on the highest test score of those who took the ACT more than one time. When the counties are ranked from highest to lowest, Cleveland county ranks first with 22.3, next is Tulsa county with 22.1, followed by Alfalfa, Payne, and Washington, all with 22.0 mean ACT scores for their respective county. The map depicts these same mean ACT composite scores categorized according to performance criteria for admission to Oklahoma public colleges and universities for first-time entering students.

The mean ACT scores range from 14.61 for McLain High School in Tulsa county with 36 test-takers to 31.91 for the Oklahoma School of Science and Math in Oklahoma county with 59 test-takers. The high school with the largest number of high school graduates who took the ACT exam was Broken Arrow High School in Tulsa county with 656 test-takers and a mean ACT of 21.95, followed by Union High School in Tulsa county with 606 test-takers and a mean ACT of 22.83.

The table entitled "Mean ACT Scores, Frequency Distributions, and Cumulative Percentages for All Students" for Oklahoma and the nation is from the ACT High School Profile Report, H S Graduating Class 2000. According to ACT, 1,065,138 high school graduates across the United States took the test. Oklahoma high school graduates represent 27,850 of these test-takers. Most of these Oklahoma test-takers, 25,461 or 91.4 percent, provided enough information to be matched with a high school ACT code and State Department of Education county/district/site code.
