The Oklahoma State Regents for Higher Education, in compliance with Titles VI and VII of the Civil Rights Act of 1964, Executive Order 11236 as amended, Title IX of the Education Amendments of 1972, Americans with Disabilities Act of 1990 and other federal laws, do not discriminate on the basis of race, color, national origin, sex, age, religion, handicap or status as a veteran in any of its policies, practices, or procedures. This includes, but is not limited to, admissions, employment, financial aid and educational services.

This publication, duplicated by the State Regents' central services, is issued by the Oklahoma State Regents for Higher Education as authorized by 70 O.S. 2001, Section 3206. Copies have been prepared and distributed internally. Copies have been deposited with the Publications Clearinghouse of the Oklahoma Department of Libraries.

Oklahoma High School Indicators Project

Remediation Rates for Oklahoma High School Graduates in Oklahoma Public Higher Education

Background

The annual report of the "Remediation Rates for Oklahoma High School Graduates in Oklahoma Higher Education" is one of four reports in the High School Indicators Project. This project is part of the State Regents' cooperative effort with the State Department of Education to provide measures or indicators of educational performance on: (1) mean ACT scores, (2) college-going rates, (3) college credit hours and GPA, and (4) remediation rates. These reports are sent to Oklahoma high school superintendents, principals, and presidents of school boards to inform them of the level of preparedness of their students who go on to college.

The data used to construct this report come from the Unitized Data System (UDS) of the Oklahoma State Regents for Higher Education. The UDS consists of data from each higher education institution for each student every semester. Beginning in 1995, remediation data were added to the UDS.

Remediation activity is also reported in the *Annual Student Remediation Report*, which differs from this report. The focus of the *Annual Student Remediation Report* is on all remediation activity occurring at the colleges and universities; whereas, this report only includes students who graduated from Oklahoma high schools. Although graduates from Oklahoma high schools account for most of the freshmen in the State System, there may be small differences between the numbers in each report.

Methodology

This report describes recent Oklahoma high school graduates who entered an Oklahoma public college or university as new freshmen in fall 2004. Since it is not possible to track individual high school graduates to college, 2004 high school graduates are defined as 17-, 18-, or 19-years old who graduated from an Oklahoma high school. These students (18,212) are full- or part-time freshmen that entered college in fall 2004.

This study used the student-cohort flow system to track students by semester and examined the courses taken throughout the 2004-05 academic year. Students who took more than one remedial course in a subject area were counted only once in that subject. Students who took a remedial course in more than one subject area were counted once in each subject area. For the total count, students were counted only once although they could have taken more than one remedial course; therefore, the total count is an unduplicated headcount of the first-time entering freshmen.

In the 2004-05 year, 6,582 freshmen from Oklahoma high schools enrolled in remedial courses; this represents 36.1 percent of the fall 2004 freshmen. As reported in the *Annual Student Remediation Report* (February, 2006), 38.7 percent of all first time freshmen enrolled in remediation includes the Oklahoma high school graduates.

For high schools with five or fewer students, the freshman headcount has been entered, but no additional information has been provided in order to comply with the Federal Educational Rights and Privacy Act (FERPA). In this case, an asterisk has been entered next to the freshman headcount in lieu of counts or

percentages. Although all remedial coursework is included, some remediation has not been identified by subject area.

Format of Report

This report describes remediation rates for each high school, which are then grouped by county. The first and second column identifies the ACT Site Code and the high school site. The next six columns represent the freshman headcount followed by the four subject areas of remedial courses: science, English, mathematics, and reading. Each of these four columns contains the count and percentage of the freshmen enrolled in at least one remedial course in that subject. The last column contains the unduplicated count and percentage, which means a student could have been remediated in more than one subject area, but would only be counted once in this column.

Analysis

The county totals are shown as summaries after their respective high schools. Table 1 shows county data at a glance; Figures 1, 2, and 3 are maps of this information. Of the fall 2004 first-time freshmen (18,212), 36.1 percent enrolled in remedial courses in science, English, mathematics, or reading. This represents an increase 1.1 percent in the unduplicated amount from the previous year. Mathematics remediation continues to remain the highest rate with 30.5 percent of the first-time freshmen taking a remedial mathematics course. The next highest remediation rate was 16.3 percent in English, followed by 5.2 percent in reading, and 2.1 percent in science. These figures do not sum to the state total remediation rate because some students may have taken more than one remedial course, but are counted once in the state total.

A county comparison shows a range in the remediation rates from 16.4 percent in Major County to 55.8 percent in Wagoner County. Of the 77 Oklahoma counties, 32 have remediation rates less than the state average of 36.1 percent. A three-year comparison of the total unduplicated remediation rates by county for Oklahoma high school graduates for fall 2002 through 2004 freshmen in Oklahoma public higher education institutions is shown in Table 2. During the nine years remediation has been reported the statewide remediation rate has fluctuated from a low 34.1 percent in 2000-01 to a high of 40.1 percent in 1998-99.
