Oklahoma High School Indicators Project

Remediation Rates for Oklahoma High School Graduates in Oklahoma Public Higher Education

Background

The annual report of the "Remediation Rates for Oklahoma High School Graduates in Oklahoma Higher Education" is one of four reports in the High School Indicators Project. This project is part of the State Regents' cooperative effort with the State Department of Education to provide measures or indicators of educational performance on: (1) mean ACT scores, (2) college-going rates, (3) college credit hours and GPA, and (4) remediation rates. These reports are provided to Oklahoma high school superintendents, principals, and presidents of school boards to inform them of the level of preparedness of their students who go on to college.

The data used to construct this report come from the Unitized Data System (UDS) of the Oklahoma State Regents for Higher Education. The UDS consists of data from each higher education institution for each student every semester. Beginning in 1995, remediation data were added to the UDS.

Remediation activity is also reported in the *Annual Student Remediation Report*, which differs from this report. The focus of the *Annual Student Remediation Report* is on all remediation activity occurring at the colleges and universities; whereas, this report only includes students who graduated from Oklahoma high schools. Although graduates from Oklahoma high schools account for most of the freshmen in the State System, there may be small differences between the numbers in each report.

Methodology

This report describes recent Oklahoma high school graduates who entered an Oklahoma public college or university as new freshmen in the fall after graduation. Since it is not possible to track individual high school graduates to college, high school graduates are defined as 17-, 18-, or 19-years old who graduated from an Oklahoma high school. These students include full- or part-time freshmen.

This study uses the student-cohort flow system to track students by semester and examines the courses taken throughout the academic year. Students who took more than one remedial course in a subject area were counted only once in that subject. Students who took a remedial course in more than one subject area were counted once in each subject area. For the total count, students were counted only once although they could have taken more than one remedial course; therefore, the total count is an unduplicated headcount of the first-time entering freshmen.

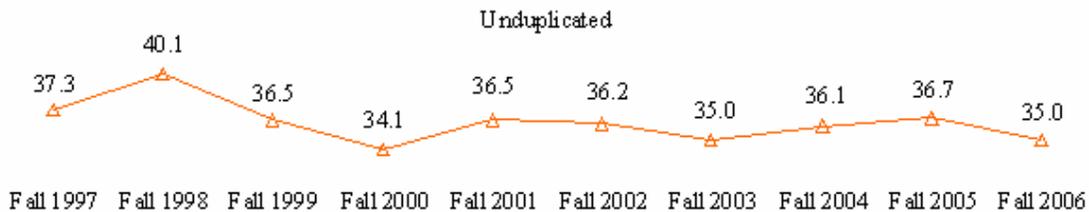

For high schools with five or fewer students, the freshman headcount has been entered, but no additional information has been provided in order to comply with the Federal Educational Rights and Privacy Act (FERPA). In this case, an asterisk has been entered next to the freshman headcount in lieu of counts or percentages. Although all remedial coursework is included, some remediation has not been identified by subject area.

Format of Report

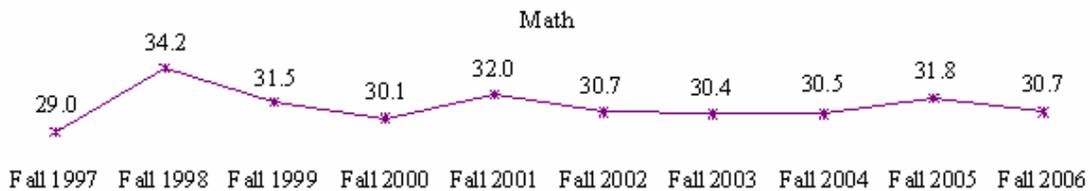

This report describes remediation rates for each high school, which are then grouped by county. The first and second column identifies the ACT Site Code and the high school site. The next six columns represent the freshman headcount followed by the four subject areas of remedial courses: science, English, mathematics, and reading. Each of these four columns contains the count and percentage of the freshmen enrolled in at least one remedial course in that subject. The last column contains the unduplicated count and percentage, which means a student could have been remediated in more than one subject area, but would only be counted once in this column.

Summary of Results

Of the fall 2006 first-time freshmen (18,318), 35.0 percent (6,419) enrolled in one or more remedial courses in science, English, mathematics, or reading. As reported in the *Annual Student Remediation Report* (March 2008), 36.5 percent of all first-time freshmen enrolled in remediation includes the Oklahoma high school graduates. The unduplicated remediation total has changed little since first being reported for fall 1996 first-time freshman. During the last ten years (below) only marginal changes have

occurred. However, fall 2006 unduplicated remediation is the second lowest in ten years and matched the 35.0 percent attained in 2003. The lowest unduplicated remediation total during that period was 34.1 percent in 2000. Mathematics remediation continues to remain the highest rate of all subject areas with

30.7 percent of all first-time freshmen in the fall of 2006 taking a remedial mathematics course. Although rates have been consistent, the 1.1 percent difference from last year is the largest single year decline since fall 2001-2002. The level of mathematics remediation remains a concern. The next highest remediation

rate is in English. After five consecutive years of increases, English remediation has declined by almost a full percentage point to 16.3 percent, down from the 17.2 percent in 2005. Remediation rates for the remaining subject areas are 4.3 percent for reading, an increase from the previous year of 4.1 percent, and 1.7 percent in science, an increase from the 1.5 posted in 2005.

It's important to note that these figures will not sum to the state total remediation rate because some students may have taken more than one remedial course, but are counted only once in the state total.

A county comparison shows a range in the remediation rates from 19.8 percent in Kingfisher County to 64.6 percent in Latimer County. Of the 77 Oklahoma counties, 33 have remediation rates less than the state average of 35.0 percent. More than three out of every 10 Oklahoma high school graduates will receive some type of remediation in one or more subject areas upon entering college. The graphs to the right represent counties with the lowest and highest unduplicated remediation rates for fall 2006 first-time freshmen.

Beginning on page 6, Table 1 shows county data at a glance followed by Figures 1, 2, and 3 that map remediation by subject and county. A three-year comparison of the total unduplicated remediation rates by county for Oklahoma high school graduates in Oklahoma public higher education institutions is shown in Table 2.

Since remediation has been reported, the statewide remediation rate has fluctuated from a high of 40.1 percent in 1998-99, to a low of 34.1 percent in 2000-01.

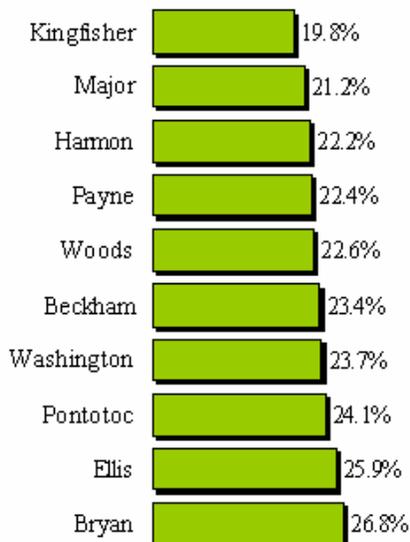

Analysis

Remediation continues to be a barrier to student success in college. Students who fail to score 19 or above on any ACT subject area test may be required to take remedial courses for that subject. In 2006 more than 6,400 graduating seniors took a remedial course in at least one subject. Students taking remedial courses graduate from college at a lower rate than those who do not. Remedial courses represent a greater cost students must bear in fees and tuition for non-credit courses. Although weak academic preparation is not the only factor affecting student success, it does represent one that has the potential of being the easiest to prevent.

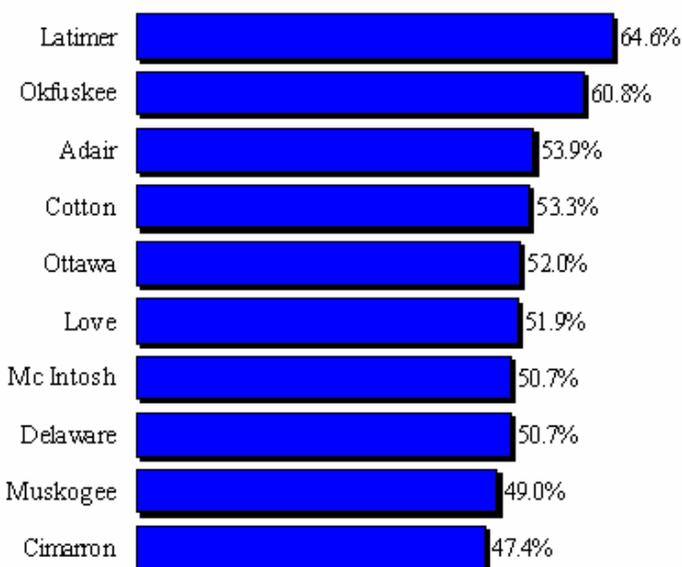

Recommendations

Many students fail to take the necessary core classes that would prepare them for college. Students taking core or more are likely to enjoy greater success in college. SB1792, Achieving Classroom Excellence (ACE) Act of 2005, provides a framework for Oklahoma public schools to implement standards necessary for students to be prepared for

Oklahoma Counties With the Ten Lowest Unduplicated Remediation Rates of Fall 2006 First-time Freshmen

Oklahoma Counties With the Ten Highest Unduplicated Remediation Rates of Fall 2006 First-time Freshmen

college and the workforce. Beginning with students entering the ninth grade in the 2006-2007 school year, in order to graduate from a public high school accredited by the State Board of Education with a standard diploma, students shall complete the college preparatory/work ready curriculum units or sets of competencies at the secondary level. In brief the act requires that students entering the ninth grade automatically be enrolled in a college preparatory curriculum. The act also mandates tuition waivers for Oklahoma high school graduates meeting concurrent enrollment eligibility requirements; it provides financial incentives for public middle school math teachers to participate in professional development opportunities; every student must also demonstrate mastery in reading and math by the end of the eighth grade or be provided remediation; and the act requires graduating Oklahoma high school seniors to take an exit exam. Complete text of SB1792 can be found at <http://www.sos.state.ok.us/documents/Legislation/50th/2005/1R/SB/982.pdf>.
