The Oklahoma State Regents for Higher Education in compliance with Titles VI and VII of the Civil Rights Act of 1964, Executive Order 11246 as amended, Title IX of the Education Amendments of 1972, Americans with Disabilities Act of 1990, and other federal laws and regulations, do not discriminate on the basis of race, color, national origin, sex, age, religion, handicap or status as a veteran in any of its policies, practices, or procedures. This includes, but is not limited to, admissions, employment, financial aid, and educational services.

This publication, printed by the State Regents’ central services, is issued by the Oklahoma State Regents for Higher Education as authorized by 70 O.S. 2001, Section 3206. Two hundred copies have been printed at a cost of approximately \$575. Copies have been deposited with the Publications Clearinghouse of the Oklahoma Department of Libraries. This publication was produced in December 2013.

Disclaimer: The information provided in this document is intended to be current at the time of its publication. However, program policies and related state laws are subject to change. Contact the program for the most current information.

## Executive Summary

**All Approved Tuition and Mandatory Fees are Within Legislative Limits.** State Regents reviewed institutional tuition and mandatory fee requests for compliance and each institution’s requests were below the posted legislative peer limits for the tier as specified in Oklahoma Statutes (Title 70, O. S. 2004 Supp., Section 3218.8 -- see Attachment 10).

Tier	Undergraduate Average				Graduate Average			
	Resident		Nonresident		Resident		Nonresident	
Research Universities	0.0%	\$7,391	2.9%	\$19,778	0.9%	\$6,818	3.0%	\$19,418
Regional Institutions	5.7%	\$5,301	5.1%	\$12,366	5.7%	\$5,057	5.1%	\$11,766
Community Colleges	5.0%	\$3,262	3.8%	\$7,674	<i>n/a</i>	<i>n/a</i>	<i>n/a</i>	<i>n/a</i>
Ardmore Higher Education Center	5.0%	\$4,270	4.7%	\$11,340	5.7%	\$4,694	5.5%	\$12,509
Professional Programs	<i>n/a</i>	<i>n/a</i>	<i>n/a</i>	<i>n/a</i>	3.1%	\$14,707	3.0%	\$30,655

**Considerations in Setting Tuition and Fees.** Oklahoma Statutes (Title 70, O. S. 2004 Supp., Section 3218.2) further provides that the impact on the ability of students to meet the costs of attendance, their enrollment patterns, availability of financial aid, the cost-effective measures which institutions implemented, and the communication of tuition and fee requests to students are to be considered when determining increases to tuition and mandatory fees. Institutions reported on each of these categories when submitting their tuition and mandatory fee requests for FY14. The findings from the institutions’ information are summarized below, with further details provided in the full report on the following pages.

**Impact on Students’ Ability to Pay** For FY14, institutions made minimal increases in tuition and fees, and, at the same time, made substantial efforts to increase waivers and financial aid. The historically low tuition rates in Oklahoma, and the economic downturn of the economy, have attracted more students, and this has not affected their ability to meet cost of attendance.

**Impact of Tuition Increases on Enrollment.** Institutions have not seen significant impact in their enrollment patterns due to tuition and mandatory fee increases. After the record high enrollments in FY11 and FY12, the enrollment has remained steady into FY14. Preliminary enrollment data shows slightly fewer students are enrolled in college during the fall 2013 semester than were last year with an overall 2.6 percent decrease. The full-time-equivalent (FTE) enrollment for the fall semester decreased by 4,122 students or 2.9 percent. Research universities report a slight increase in fall enrollment with an average 0.6 percent increase or 287 students in full-time enrollment while regional universities and community colleges report 2.5 percent (1,112 students) and 7.0 percent (3,297 students) decreases, respectively. Future trends indicate that external factors such as fewer high school graduates, military deployments, restrictions on international students, increased fuel prices, the economy, and the lack of jobs, rather than increases in tuition and fees, impact enrollment trends.

**Availability of Financial Aid.** For FY14, resident tuition waivers increased by 6.9 percent, approximately \$3.6 million more than in FY13 for a total of \$56.1 million in total resident waivers. Students eligible for *Oklahoma's Promise* (Oklahoma Higher Learning Access Program, or OHLAP) will continue to have the tuition portion of the increase covered while being responsible for the increase in fees and other educational expenses. Several institutions have extended scholarship programs to help eligible students with the additional costs of attendance. Many institutions have implemented cost-savings measures related to textbook costs. Institutions continue to help students discover all sources of available assistance and are committed to assisting students so that no student eligible for admission will be denied access because of the cost of attendance.

**Implementation of Cost-effective Measures.** Institutions continuously monitor administrative and programmatic costs in order to maximize their operational budgets as they deal with changes in student enrollment and increases in mandatory costs while striving to maintain a standard of excellence in instruction and in student service areas. They are proactively exploring new programs and grants in their efforts to find additional sources of revenue for their institutions and are implementing energy conservation programs in an effort to reduce utility costs and the impact on the environment and increase sustainability.

**Communication with Students.** Institutions presented information to students and student advisory groups in a variety of ways and on a continuing basis explaining necessary tuition increases, economic and budgetary concerns, and the impact on students, faculty and staff, and capital projects on campus. The general overall consensus of students was positive and supportive of a moderate tuition increase, particularly one to enhance the learning experience.

**State Regents' Initiatives.** The State Regents currently have several initiatives related to public policy questions of tuition, affordability, and student information.

1) Complete College America is the most comprehensive and ambitious higher education initiative ever undertaken by the state of Oklahoma. The goal is to increase the number of degrees and certificates earned in Oklahoma by 1,700 per year for 12 years to a level of 50,900, resulting in a 67 percent increase by 2023. This must be done to meet the projected need of 313,073 additional college-educated workers to keep Oklahoma competitive in a global economy. The plan includes these items as its major initiatives:

- Focus on College Readiness
- Transform Remediation
- Strengthen Pathways to College Certificates and Degrees
- Increase Adult Degree Completion
- Reward Performance

2) Oklahoma State Regents, the Governor and State Legislature encouraged institutions to keep undergraduate resident tuition and mandatory fee rates within a moderate range of last year's tuition rates. The twenty-five institutions stayed within the 4.7 percent. Both research institutions, University of Oklahoma and Oklahoma State University kept tuition rates the same as previous year with no increase. University of Oklahoma implemented a flat rate tuition and mandatory fee based on 15 credit hours per semester for full-time undergraduate students carrying between 12

to 21 credit hours during Fall and Spring semesters. One higher education program (Ardmore) raised the tuition 7.6 percent. The nine constituency agencies had a large range, from an increase of 0.2 percent (OU Health Science Center) to an increase of 17.6 percent. (SEOSU-Grayson Co.)

3) The State Regents provide financial support for the *Achieving Classroom Excellence (ACE)*, a Legislatively created initiative designed to align high school curriculum with college entrance requirements, through EPAS, GEAR UP, the American Diploma Project, Summer Academies, the Student Information Portal, Upward Bound, and other programs that involve intervening at the high school level so students will be better prepared for college.

4) The State Regents received \$1,598,928 from the U. S. Department of Education as a part of the *College Access Challenge Grant*. This grant program provides over 600 scholarships to students who are near completion of a college degree and have demonstrated a need for financial aid. This program will expand and enhance current initiatives aimed at increasing the number of college graduates.

5) The student information portal OKcollegestart.org was launched in spring 2007 to help students plan and prepare for college. OKcollegestart.org is a comprehensive, web-based information system developed specifically for prospective and current college students and serves as a “one-stop” destination for students, parents and high school counselors for information about colleges and universities, financial aid, and other resources. Registration is free, and potential students can plan and apply for colleges in Oklahoma, explore careers, request high school transcripts (in Oklahoma schools,) apply for Oklahoma’s Promise and other services as they prepare for college. In 2010, the site was renovated and additional features added.

6) The State Regents continue to provide the *Concurrent Enrollment Tuition Waiver Program* for eligible high school seniors enrolled simultaneously at their high schools and at higher education institutions in the state.

7) Guaranteed tuition rates (or tuition lock rates) at four-year public institutions were offered for the first time during FY09. This program provides families with predictability in budgeting for college and also encourages students to graduate in four years.

8) *Reach Higher: Oklahoma’s Degree Completion Program* was launched in March 2007 at Oklahoma’s regional public universities. This innovative program allows working adults with at least 72 hours of college credit to earn a bachelor’s degree in 15 to 18 months in a flexible and accelerated format. The program was expanded to include two-year associates’ degrees in 2010-11.

9) Cooperative alliance agreements are in place at all 29 technology centers throughout the state of Oklahoma allowing students to earn college credit toward an associate workforce degree while attending their local technology center.

10) Best practices initiatives in enrollment management and financial aid programs began in 2005 with the Noel-Levitz system-wide review of Oklahoma's higher education institutions. Recent efforts are focused on Complete College America Initiatives to improve high school preparation and delivery of remediation. In addition, a new student-level financial aid data collection system is being implemented and will be used in conjunction with the current Unitized Data System (UDS) to allow more detailed analysis of financial aid programs and utilization of financial aid.

11) The Oklahoma State Regents for Higher Education, Oklahoma College Assistance Program (OCAP) recently launched expanded student loan management initiative, Ready Set Ready at [www.ReadySetRepay.org](http://www.ReadySetRepay.org), an initiative to further empower student loan borrowers to make smart borrowing decisions and successfully navigate student loan repayment.

12) The Oklahoma State Regents for Higher Education, Oklahoma College Assistance Program (OCAP) launched Oklahoma Money Matters (OKMM) at [www.OklahomaMoneyMatters.org](http://www.OklahomaMoneyMatters.org), an online education program designed to help students of all ages plan and manage their financial future. This resource clearinghouse offers hundreds of publications, websites, calculators and other tools online. Materials cover a wide range of topics, including credit, savings, banking, teaching children about money, financial planning, managing student loans and paying for college. Most resources are in English, but some are available in multiple languages, including Spanish.

13) The Oklahoma State Regents for Higher Education, Oklahoma College Assistance Program (OCAP) launched UCanGo2 at [www.ucango2.org](http://www.ucango2.org), an outreach program designed to help high school students and parents plan for college. The resource includes how to pay for college with scholarship, financial aid, and federal loans. The Oklahoma College Access Network (OK-CAN) at [www.okcollegeaccess.org](http://www.okcollegeaccess.org) is a coalition of college access initiatives across Oklahoma provides professional development, technical assistance and networking opportunities for participating organizations, facilitating the exchange of information to better service Oklahoma students.

14) The Oklahoma State Regents for Higher Education's GEAR UP Program ([www.okhighered.org/gearup](http://www.okhighered.org/gearup)) received a third consecutive multi-million federal grant from the U.S. Department of Education (USDE) in 2011. The Gear Up grant will provide \$4.9 million in 2013-2014 and \$34.9 million over the seven year grant to continue college preparation programs that strengthen learning and increase student achievement across Oklahoma. GEAR UP, Gaining Early Awareness and Readiness for Undergraduate Programs, is a federal grant program designed to help middle and high school students better prepare and succeed in post-secondary education.

**National Perspective.** The average national published rate for 2013-14 tuition and mandatory fees is \$8,893 for undergraduate resident students at four-year institutions and \$3,264 at two-year institutions. Oklahoma's rates are \$5,623 and \$3,262 respectively. On average, students and their families pay considerably less than published tuition and fee rates after receiving financial aid and tax benefits readily available from various sources. The U.S. Chamber of Commerce ranks Oklahoma higher education No. 7 in affordability and No. 8 in efficiency in the nation.

During 2012-13, \$238.5 billion in financial aid was distributed to undergraduate and graduate students in the form of grants from all sources, federal work-study funds, federal loans, and federal tax credits and deductions. In addition, students borrowed an estimated \$8.8 billion in loans from state, private, and institutional sources to help finance their education. A total of \$247.3 billion in financial aid was awarded.

Total state appropriations for public colleges and universities declined from \$72.7 billion in 2011-12 to \$72 billion in 2012-13 down approximately \$0.7 billion or 1 percent. State appropriations declined by 19 percent from \$88.7 billion in 2007-2008 to \$72 billion in 2012-13. Changes in public appropriations for higher education institutions are cyclical, with declines corresponding to a weak economy and growth occurring during periods of economic strength.

Nationally, real dollar increases in tuition charges have largely "replaced" state revenues as a funding source for higher education, leading to considerable growth in the percentage of costs borne by students and families. *How America Pays for College*, a study conducted by Sallie Mae and Ipsos, reports how families pay for college varies across income levels and there is no easily defined standard, but on average, parents contributed 27 percent of the cost through their income and savings plus 9 percent through borrowing, students contributed 29 percent, scholarships and grants covered 30 percent, and the remaining 5 percent was contributed by relatives and friends.

The American Recovery and Reinvestment Act (ARRA) of 2009 were signed into law by President Obama on February 17, 2009. It was an unprecedented initiative to jumpstart the economy and to create or save jobs. The legislation invested heavily in education and included \$98.2 billion for supplemental appropriations for reforms to strengthen elementary, secondary and higher education, including money to stabilize state education budgets and to encourage states to improve teacher quality, improve low-performing schools and improve student readiness for college and careers through system enhancements. The Act provided \$30 billion to spur innovation, addresses college affordability and improved access to higher education. In 2010-11, Oklahoma received \$59.8 million ARRA stimulus funding compared to \$68.8 million in 2009-10. As of 2011-12, ARRA stimulus funding was no longer available.

**The Investment in Higher Education.** The investment in higher education has significant return, both monetary and non-monetary, for the individual and society as a whole. Higher levels of education result in higher lifetime earnings for all racial/ethnic groups compared to high school graduates. A higher education degree also improves an individual's level of civic participation, and creates a decrease in dependence on social programs and increases tax revenues among other things.

## **Process for Approval of Tuition and Mandatory Fee Requests for Fiscal Year 2014**

Oklahoma Statutes (Title 70, O. S. 2004 Supp., Section 3218.8) specifies the maximum limits for resident and nonresident tuition and mandatory fees for undergraduate and graduate programs, by tier (research universities, regional universities, community colleges), and for professional programs. In order to establish the limits, State Regents' staff compiled a listing of tuition and mandatory fees charged by twelve public institutions, by like-type public four-year institutions in surrounding and other states, by public community colleges receiving no local tax funding in surrounding or other states, and for professional programs. This is the fifth year for the University of Central Oklahoma, in recognition of its status as a regional urban university, and the University of Science and Arts of Oklahoma, in recognition of its status as the state's premier regional liberal arts college to have their own regional peer groups. The *FY14 Legislative Peer Limits for Tuition and Mandatory Fees* (Attachment 3) reflects the results of the survey whereby the statutory limits were established consistent with statutes. The steps of the approval process proceeded as follows:

- 1) State Regents posted the FY14 Legislative Peer Limits (Attachment 3) at their meeting on March 7, 2013.
- 2) Statewide, institutions held campus discussions to explain the economic realities as they related probable increases in tuition and fees and projected mandatory cost increases. The students were kept informed on a continuing basis, and student input was solicited and communicated to institutional executives and governing board members.
- 3) A public hearing was held at the State Regents' office on April 18, 2013 (Attachment 2) for the purpose of receiving comments and to comply with policy and statute. A copy of the transcript of the comments made at this meeting is attached (Attachment 5).
- 4) The *Tuition and Fee Approval Guidelines* (Attachment 4) were posted at the Regents meeting on May 31, 2013 to give direction to institutions on the tuition request process.
- 5) Institutions submitted their tuition and mandatory fee requests for FY14, approved by their governing boards, to the State Regents by June 12, 2013, after determination of the higher education appropriation. All institutions' rates are less than the maximum legislative peer limits, although a few specialized programs are at or near 100 percent of their legislative peer limit.
- 6) Presidents presented information to the State Regents concerning their FY14 tuition and fee requests at the State Regents' tuition review meeting held on June 26, 2013.
- 7) State Regents approved institutions' requests at their regular meeting on June 27, 2013.

- 8) Subsequent to the June 27, 2013 State Regents' meeting and approval of all tuition and fee requests, State Regents' staff reviewed institutions' published tuition and fee schedules for compliance with policy and with State Regents' action. All institutions were found to be in compliance with the approved tuition and fee rates and with the required publication of those rates (State Regents Policy, Chapter 4.18.4.B).<sup>1</sup>
- 9) The final step in the approval process is the submission of this *Tuition Impact Analysis Report* to the Governor and Legislature prior to January 1, 2014.

---

<sup>1</sup> Oklahoma State University in Oklahoma City and in Okmulgee and Southeastern Oklahoma State University at Grayson County College, in Idabel, and at Oklahoma City Community College each provide unique programs to upper division students. Since these programs do not admit first-time entering freshmen, the guaranteed tuition rates for these programs are established solely to accommodate eligible, upper division transfer students from four-year colleges.

## Summary of FY14 Tuition and Mandatory Fee Increases and Comparison to the Legislative Peer Limit

The following table shows, by tier, the FY14 legislative peer limit, the average cost for a full-time student, the difference from the legislative peer limit, Oklahoma average rates as a percent of the legislative peer limits and the percentage change from FY13.

### Analysis of FY14 Tuition and Mandatory Fee Increases

Research Universities					
Undergraduate	FY14 Legislative Peer Limit	Average FY14 Cost	Average Difference from Peer	Oklahoma as % of Peer	Average% Change in Tuition
Resident	<b>\$8,573.00</b>	\$7,391.00	\$1,182.00	86.2%	0.0%
Nonresident	<b>\$24,154.00</b>	\$19,778.00	\$4,376.00	81.9%	2.9%

Resident	<b>\$19,188.00</b>	\$14,707.00	\$4,481.00	76.6%	3.1%
Nonresident	<b>\$35,845.00</b>	\$30,655.00	\$5,190.00	85.5%	3.0%

This bar graph compares the average FY14 tuition and mandatory fees paid by full-time undergraduate resident students at each tier to the legislative peer limit for each.

All institutions are in compliance with statutory requirements for tuition and mandatory fees as specified by the Oklahoma Legislature. See Attachments 6 through 10 for detailed information on FY14 tuition and mandatory fees for undergraduate, graduate, and professional programs by institution.

## **FY14 Guaranteed Tuition – Tuition Lock Program**

During the 2007 Legislative session, House Bill No. 2103 was passed by the Legislature and signed by the Governor. This legislation, also referred to as the *Tuition Lock Program*, authorized institutions to establish a guaranteed tuition rate program for first-time-entering, full-time, undergraduate resident students starting in the 2008-09 academic year. During the 2008 Legislative session, House Bill No. 3397 made subsequent revisions and clarifications to the *Tuition Lock Program*. It was passed by the Legislature, signed by the Governor, and became effective immediately.

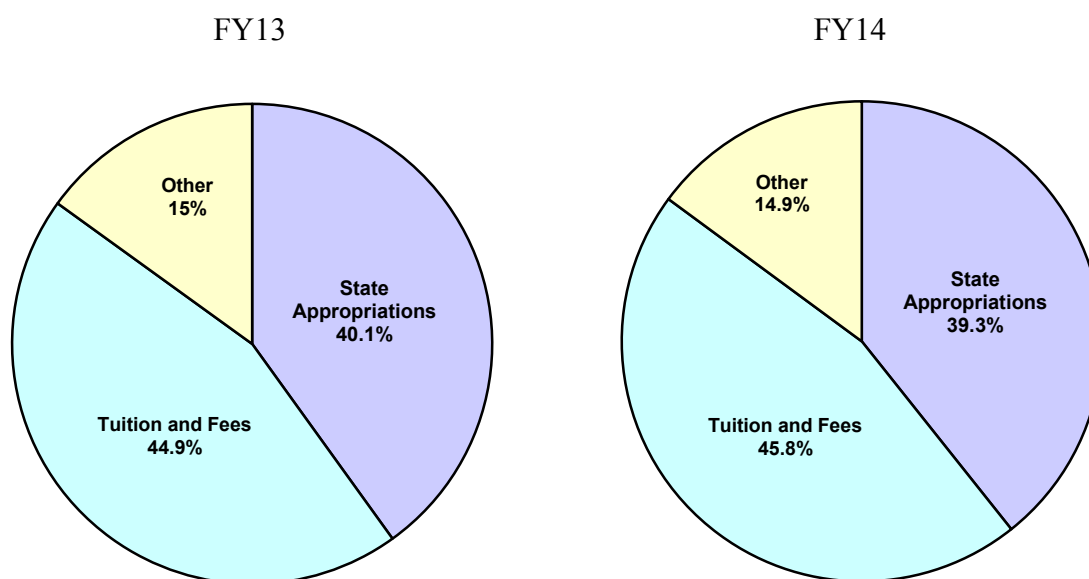

The Tuition Lock Program began with the Fall 2008 semester. First-time students attending full-time now have the option to participate in the guaranteed tuition rate program at the time of their first enrollment. If they choose to participate in the guaranteed tuition program, they receive the guaranteed tuition rate for four years (or the normal time-to-degree if longer, as determined by the institution) as long as they maintain full-time status during the fall and spring semesters. Certain exceptions are made for students who transfer and for those who are required to withdraw due to military or other national defense emergencies. The guaranteed tuition rate may not exceed 115 percent of the nonguaranteed tuition rate.

Guaranteed tuition rates at four-year institutions range from \$3,690 to \$5,422 for a full-time resident student. Among “other” programs at four-year institutions, guaranteed tuition rates range from \$3,690 to \$6,486. Mandatory fees are also required in addition to the guaranteed tuition.

All institutions are in compliance with statutory requirements for guaranteed tuition as specified by the Oklahoma Legislature. See Attachments 11 and 12 for detailed information on FY14 guaranteed tuition by institution.

## What Portion of Costs Do Oklahoma Students Pay?

The pie chart below compares the portion of costs paid by students in FY14 to that of the previous year. In FY13, student revenues contributed 44.9 percent of the educational and general budget; state appropriations (including state-funded grants) made up 40.1 percent, while other revenue contributed only 15 percent. In comparison, student revenues contributed 45.8 percent of total revenue and state appropriations contributed 39.3 percent, while other revenue contributed only 14.9 percent in FY14.

Since FY01, state appropriations support for Oklahoma higher education institutions has consistently decreased from 62.3 percent to 39.3 percent of total operating budget revenues, while student revenues have increased from 25 percent to 45.8 percent respectively. This trend reversed temporarily in FY07 when state appropriations support equaled 50.8 percent of total revenues, but since then has reverted back to the trend of decreasing state appropriations support and increasing student revenues. In an effort to combat the recession, the federal government disbursed funds to all states in the form of the American Recovery and Reinvestment Act (ARRA). This stimulus funding was disbursed throughout the states and through common and higher education. In FY10, Oklahoma received ARRA funds in the amount of \$68.8 million which was used to offset a decrease of \$35 million in state appropriated income during that fiscal year. For FY11, Oklahoma received its' final ARRA disbursement in the amount of \$59.8 million and was used to offset a decrease of \$38.2 million in state appropriated income for the 2011 fiscal year. The ARRA funding represented 2.9 percent of total budgeted income and accounts for the majority of the increase in the category of "Other Funds. State Regents continue to be concerned with the consistent decline in state support and continue their efforts to increase state funding and eliminate further erosion in the future. It should be noted that all ARRA funds have been exhausted. Therefore, ARRA stimulus funding was no longer available since FY12.

## **Process for Approval of Academic Services Fees**

Oklahoma Statutes (Title 70, O. S. 2004 Supp., Section 3218.10) authorizes governing boards of institutions to establish academic services fees, which are special fees charged for instruction and academic services in addition to tuition and mandatory fees. These fees are assessed certain students as a condition of enrollment and as a condition of academic recognition for completion of prescribed courses. Such fees are assessed students receiving certain courses of instruction or certain academic services as designated by the institution. These services may include, but shall not be limited to, special instruction, testing, and provision of laboratory supplies and materials.

State Regents' policy specifies February 1 as the deadline for submission of requests for changes in these fees to be charged during the FY14 academic year. Institutions submitted their requested changes to academic services fees and they were posted for discussion purposes at the Regents' meeting held March 7, 2013. Institutions provided justifications for all of the requested changes in academic services fees, the total revenue to be collected from the fees, and the use of increased revenues.

A public hearing was held on April 18, 2013 for the purpose of receiving views and comments on the requested changes. A transcript of the comments made at the public hearing is attached (see Attachment 5). The State Regents approved all the requested changes to academic services fees for FY14 at their regular meeting held June 27, 2013.

## **Analysis of Changes to Academic Services Fees**

Of the twenty-five public institutions and six constituent agencies in The State System, twenty-six requested changes in academic services fees for Fiscal Year 2014 and five had no requests for changes in these fees. Fifteen institutions have requested 47 changes in Special Instruction Fees; nine institutions have requested 38 changes in Facility/Equipment Utilization Fees; six institutions have requested 31 changes in Testing/Clinical Services Fees; fourteen institutions have requested changes in 88 Classroom/Laboratory Supply and Material Fees; and fifteen institutions have requested 79 changes in various Other Special Fees. A total of 283 changes have been requested to academic services fees for Fiscal Year 2014, an increase of 34 requests (+12%) when compared to FY13 requests.

Institutions estimate approximately \$15.31 million in new revenue for academic service fees. This money will be used for costs associated with providing these services to students.

## Considerations in Setting Tuition and Fees

Oklahoma Statutes (Title 70, O. S. 2004 Supp., Section 3218.2) provides that the impact on the ability of students to meet the costs of attendance, their enrollment patterns, availability of financial aid, the cost-effective measures which institutions implemented, and the communication of tuition and fee requests to students are to be considered when determining increases to tuition and mandatory fees. Institutions reported on each of these categories when submitting their tuition and mandatory fee requests for FY14. The findings from the institutions' information are reported below.

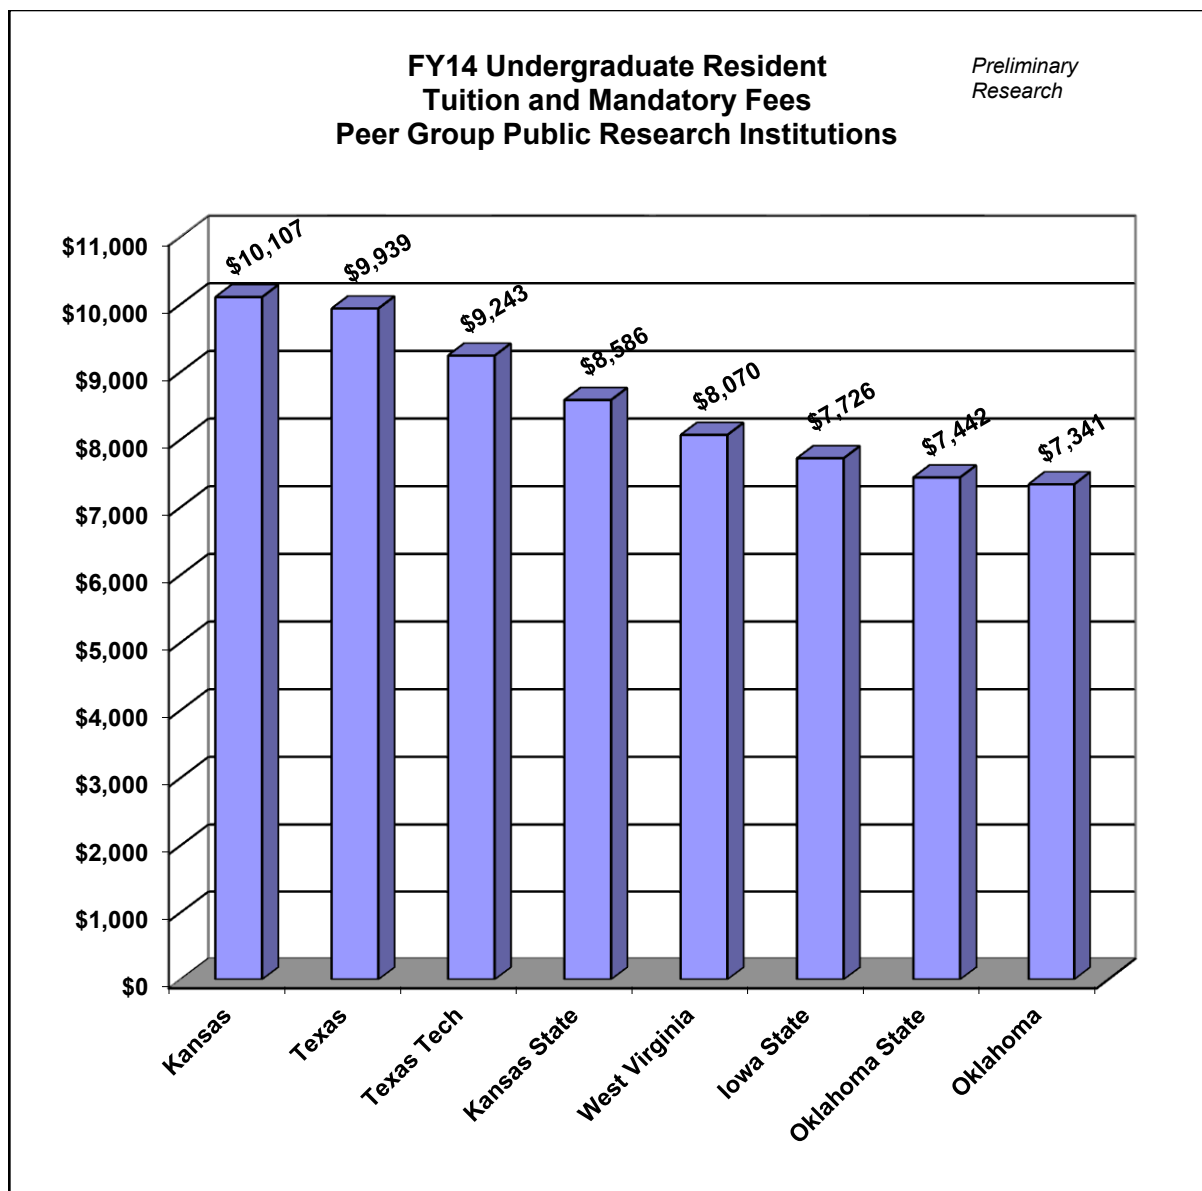

**Impact on Students' Ability to Pay.** Institutions report that they are confident that the cost of higher education in Oklahoma is continues to be one of the most affordable in the country. The FY14 tuition and fees increase requested is at a level that minimizes the impact to students while providing funding necessary to ensure continuation of excellence in instruction and operations without impacting low cost position relative to peer institutions. Institutions are able to continue offering the quality and quantity of courses and sections necessary to provide the best educational opportunities possible for Oklahoma students. The minimum level of tuition and fees increased by 4.7 percent is manageable through the maximum utilization of financial aid therefore the impact on students' ability to meet the costs of attendance is very minimum.

Federal changes to the Pell Grant program will provide more funding for at-need students. Additionally, Direct Lending making loans more affordable and accessible to students. Many institutions expanded scholarship programs and tuition waivers to help students. College Work Study programs expanded to offer help to students in need of additional financial aid and initiated or continued textbook reserves or rentals on campus. In addition, colleges offer payment plans allow students to pay tuition and fees throughout the semester.

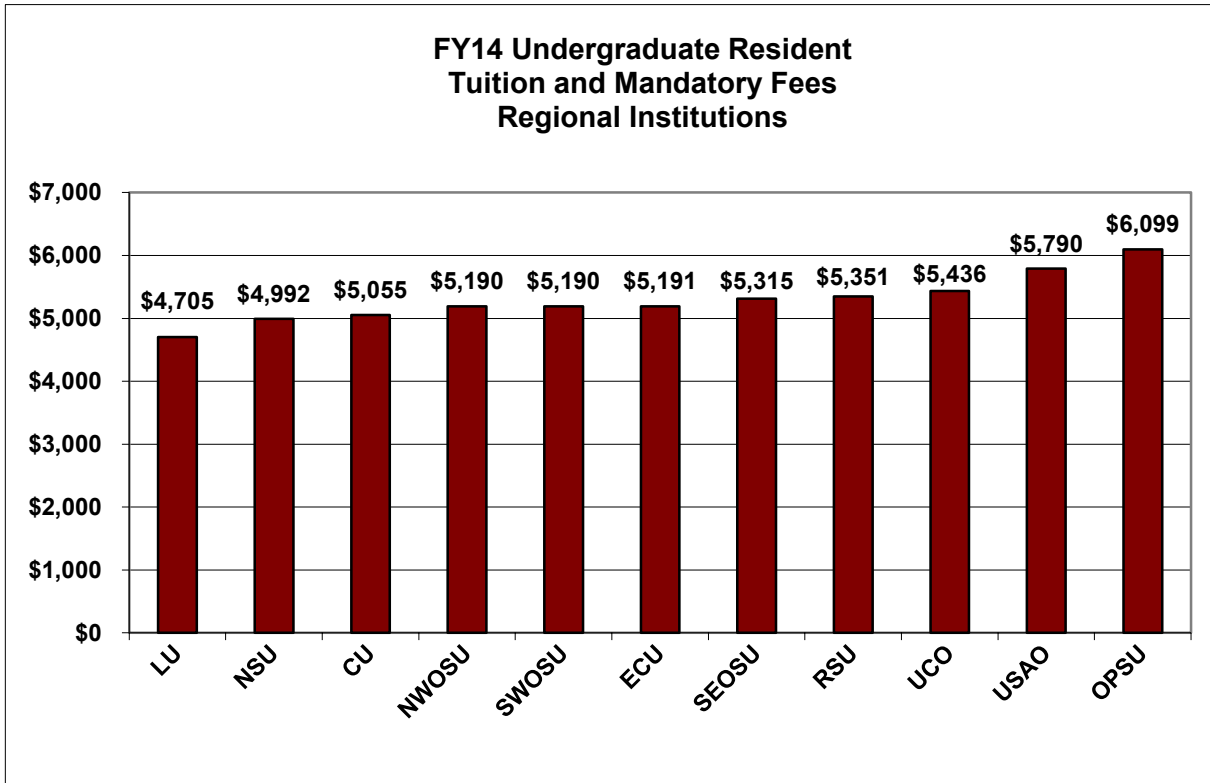

A large percentage of students receive some type of scholarship and/or financial aid which offset the cost of tuition and fees. In institutions the tuition and fees are very affordable, tuition and fees can be fully funded if a student receives Pell or loans. Some students may elect to seek alternative student loans as they manage the cost of their education. This may result in an increase in debt at graduation. Students may also elect to take fewer credit hours thereby reducing student FTE as well as increasing the time-to-degree.

Institutions report that corresponding increases in grants, scholarships, fee waivers, and other financial aid, as well as increased on-campus student employment and payment plans, provide a range of resources available for assistance in helping offset the cost of tuition and fees, particularly for those students who do not qualify for financial aid. Overall, institutions feel confident that the cost of higher education in Oklahoma is one of the most affordable in the country and no student will be denied educational opportunities due to cost. Colleges anticipate student will be able to meet the cost attendance.

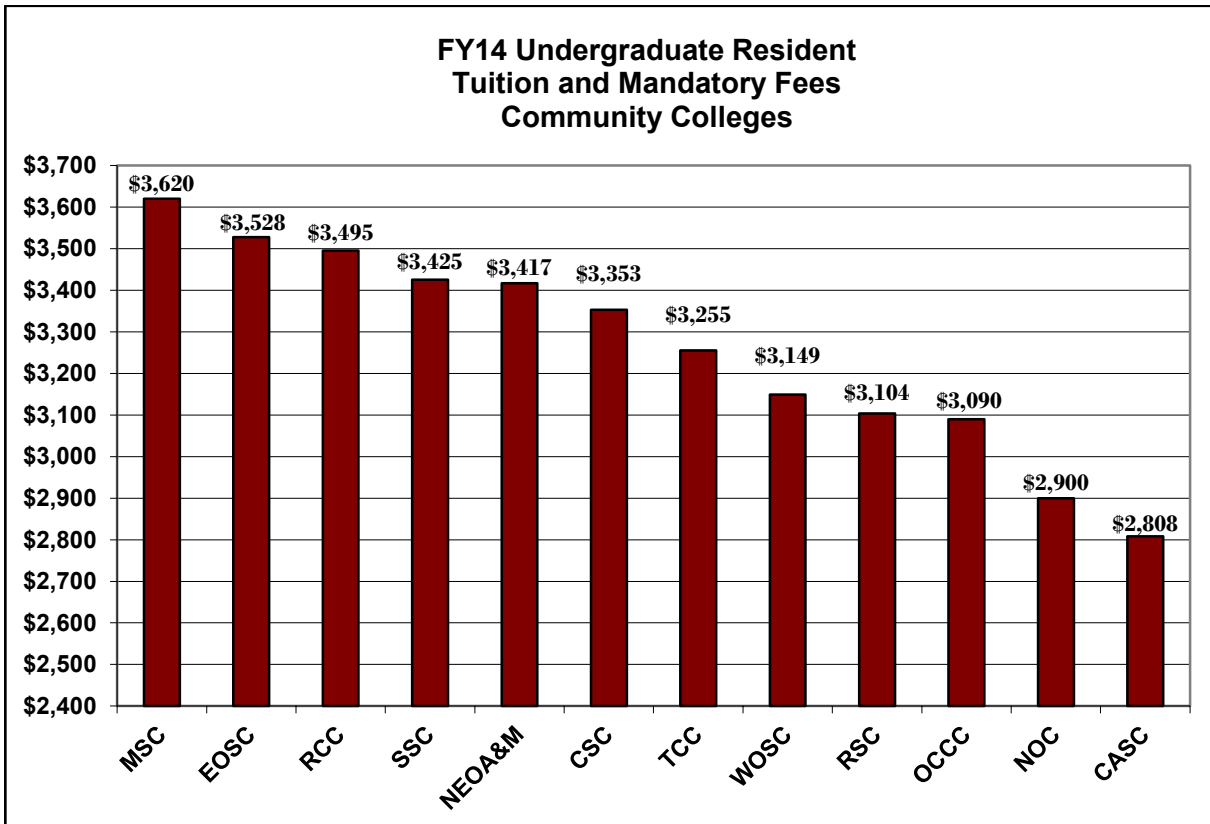

For FY14, OU and OSU continue to remain near the bottom for the Statutory Tuition and Fee Peer Institutions (Big 12) in average annual tuition and mandatory fee costs for undergraduate attendance. Both research institutions have not increased the tuition and fees in FY14. The annual cost for a full-time undergraduate resident student at OU is \$7,340.50 and \$7,441.50 at OSU. The bar graph below shows the results of preliminary research on the FY14 cost of resident tuition and mandatory fees for a full-time undergraduate student at the six public peer institutions.

At regional institutions, the FY14 resident and nonresident tuition and mandatory fees for a full-time undergraduate student also increased. The bar graph below shows the FY14 annual cost for resident tuition and mandatory fees for a full-time undergraduate student at each of the regional institutions.

The bar graph below shows the FY14 annual cost for resident tuition and mandatory fees for a full-time undergraduate student at each of the community colleges.

Graduate resident tuition and mandatory fees rates increased overall average by 4.4 percent. Professional programs tuition and mandatory fees for resident students increased on average of 3.1 percent. At the University of Oklahoma, College of Law, there is no increase on tuition and mandatory fees for both resident and nonresident students. The OUHSC average resident tuition and mandatory fees increased by 2.7 percent and nonresident tuition and mandatory fees increased by 2.8 percent for their various programs. The Professional programs mandatory fees range from a decrease of 2.7 percent to an increase of 20.7 percent for the Osteopathic Medicine program at Oklahoma State University, Center for Health Sciences.

In comparison to their respective legislative peer limits, Oklahoma institutions range from 53.4 percent to 96.5 percent of their corresponding legislative peer limit for undergraduate resident tuition and mandatory fees, and average 73.2 percent. More specifically, research institutions average 86.2 percent, regional institutions average 79.9 percent, and community colleges average 62.0 percent of their respective legislative peer limit. Nonresident tuition and mandatory fees in comparison to their corresponding legislative peer limits average 81.9 percent system-wide, 81.9 percent at research institutions, 82.8 percent at regional institutions, and 80.6 percent at community colleges. This confirms the historically low tuition rates which Oklahoma higher education institutions provide.

Graduate resident and nonresident tuition and mandatory fees in comparison to their corresponding legislative peer limits average 76.7 percent and 88.9 percent respectively, and professional programs average 76.6 percent and 85.5 percent respectively. Institutions will need to be cautious when setting tuition for special programs so as not to price low-income students out of these particular academic fields.

Institutions acknowledge concerns expressed by students of the difficulties they are experiencing in the current economic environment, but the greater impact would be the inability to provide a quality educational experience for the students by cutting services and the number of class sections offered. The institutions feel this is not an acceptable alternative and are carefully reviewing program and administrative costs in order to maintain or increase the quality of programs.

**Impact of Tuition Increases on Enrollment.** Institutions do not expect significant impact on enrollment patterns, including groups defined by socioeconomic statistics. Several institutions indicate their pre-enrollment numbers have remained steady or slightly declined for fall 2013. Research universities anticipate increases in enrollment in fall 2013 as more students plan on pursuing higher education with master degrees after graduated with a bachelor degree. Several external factors, such as an anticipated reduction in the number of graduating high school seniors, military deployments, restrictions on international students, increased fuel prices, the economy, and the tightening employment market most likely will not have an adverse effect on enrollment in the short-term outlook.

Where headcount enrollment is a record of the number of individual students on a campus, the full-time-equivalent (FTE) enrollment is a measure of the number of credit hours in which students enroll. FTE enrollment has increased only 3 of the 27 state institutions. The range is from a decrease of 19.8 percent at Western Oklahoma State College to an increase of 1.6 percent at Oklahoma State University and Connors State College. The table below reflects the percentage change in FY14 full-time resident undergraduate tuition and mandatory fees by

institution as compared with the full-time-equivalent change in enrollment as reported in the *Fall 2013 Preliminary Enrollment Report*.

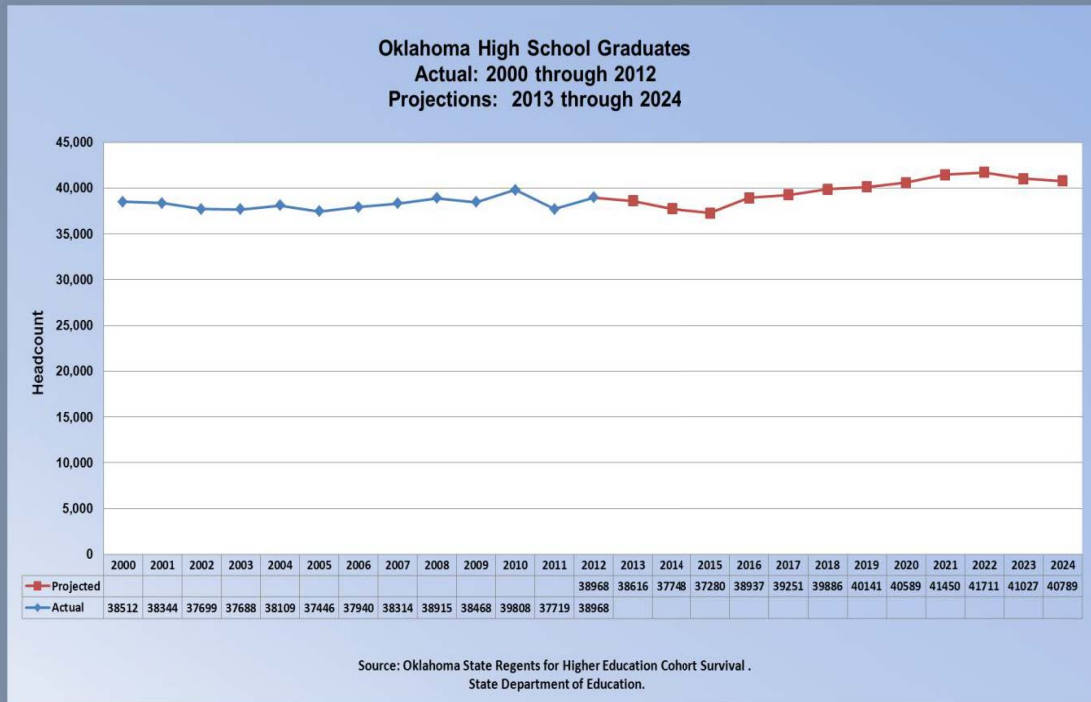

<b>Change in FY14 Resident Undergraduate Tuition and Mandatory Fees vs. Change in Fall 2013 Preliminary FTE Enrollment</b>		
<i>Main Campus</i>	<i>FY14 Tuition and Mandatory Fee Change</i>	<i>FY14 FTE Enrollment Change</i>
University of Oklahoma	0.0%	0.0%

*Source: FY14 Tuition and Fee Rate Report and Fall 2013 Preliminary Enrollment Report*

Enrollment throughout the State System has seen slight decreases in recent years. Compared to fall 2000, 32,143 more students have enrolled in Oklahoma public colleges and universities, a 16.8 percent increase, to a fall headcount enrollment of 186,067 in fall 2013.

As shown in the following graph, preliminary data for the *2011-2012 Annual Report* projects that high school graduation rates will fluctuate slightly from an all-time high of 39,808

graduates reported in 2010, begin a consistent decline and rebound after 2015 with consistent increases for seven years before declining again in 2023. This may have an impact on college enrollment in the near future.

Overall, the increase in tuition and fees has not significantly affected enrollment patterns for FY14. Students and the general public appear to understand the importance of obtaining a college education, that Oklahoma higher education institutions are striving to contain expenses, and that they continue to provide an exceptional value.

**Availability of Financial Aid.** Students will still need to take full advantage of all available student aid. Institutions are providing additional financial aid workshops to educate students about the availability of and the varying types of financial aid available and to assist students in securing all types of assistance for which they are eligible. In addition, institutions are maintaining or increasing the level of tuition waivers for both undergraduate and graduate students to insure continued progress toward degree completion and are utilizing the full 3.5 percent of their total E&G Budget – Part I for resident tuition waivers as authorized in State Regents’ policy.

The average increase in institutions’ budgeted resident tuition waivers is 8.0 percent, an increase of more than \$4.17 million over FY13, compared to an average increase of less than 4.7 percent in resident tuition. More than half of the institutions increased their resident tuition waivers while three institutions maintained the same level as in FY13 and three decreased these waivers, as shown in the chart below. When total tuition waivers are considered, the average increase is 6.5 percent.

<i>Institution</i>	<i>Percent Change in FY14 Tuition &amp; Mandatory Fees</i>	<i>Percent Change in FY14 Resident Budgeted Tuition Waivers</i>	<i>Percent Change in FY14 Total Budgeted Tuition Waivers</i>

Source: FY14 Tuition and Fee Rate Report and FY14 E&G Summary and Analysis

Institutions are also increasing grants, scholarships, and other financial aid, providing increased on-campus student employment and payment plans, all of which provide a range of resources available for assistance in helping offset educational costs for those students who are most affected by the costs or are not eligible for financial aid.

Students eligible for *Oklahoma's Promise* will continue to have their tuition covered while being responsible for any increase in fees and other educational expenses. The funding allocated to *Oklahoma's Promise* increased from \$11 million in FY04 to \$57 million in FY14. The number of students receiving *Oklahoma's Promise* award has increased from about 6,000 in FY04 to about 20,000 in FY14. The projected average award will be approximately \$3,000 in FY14, an increase of 69 percent from the average award of \$1,770 in

FY04. Since FY05, ten institutions have rolled some or all of their mandatory fees into their tuition rate in order for students to receive more aid from *Oklahoma's Promise*, as well as other similar scholarship programs that fund the tuition-only portion of expenses, although a moratorium was placed on this practice for FY08 and successive years.

In order to fully fund *Oklahoma's Promise* from a stable revenue source, the 2007 Oklahoma Legislature passed legislation to create a permanent, dedicated funding stream for *Oklahoma's Promise*. Since FY09, the State Regents have reported the level of funding needed for *Oklahoma's Promise* for the upcoming fiscal year to the State Equalization Board for certification. Once certified, the State sets aside that amount of funding for the program “off the top” before any other appropriations are made to any other programs in order to fulfill the state’s promise to qualified students. In addition, several other changes have been made to the scholarship program, which include:

- Second income limit requirement
- Statutory college grade point average (GPA) requirement
- Homeschool student eligibility;
- College conduct requirement; and
- Immigration status requirement.

For federal financial aid recipients, the “institutional cost of education” figures will continue to be based on tuition and mandatory fees. As a result, students will be eligible for aid in the form of loans, supplemental grants, and college work-study. As the minimum hourly wage increases, student workers’ wages will also increase, mirroring the federal minimum wage increase being implemented nationwide. The maximum Pell Grant, the largest federal grant program based on financial need, increased from \$5,350 in FY10 to \$5,550 in FY11 through FY13. The maximum Pell Grant for FY14 increased to \$5,645 per student, an increase of \$95 or 1.7 percent.

Student loan providers have implemented some incentives to students in the form of a reduction in student loan interest rates and a decrease in the origination fee. Subsidized Stafford loan interest rates decreased to 4.5 percent for 2010-2011, and 3.4 percent for 2011-2012 and 2012-13. The interest rates for 2013-14 are 3.86 percent for undergraduate students and 5.41 percent for graduate students.

Data released by the Oklahoma State Regents for Higher Education reveals that 68 percent of students attending state system institutions received nearly \$1.14 billion in some form of financial aid during 2008-09, an increase of 12.8 percent, or \$129 million, compared to 2007-08. However, more than half of all financial aid dollars awarded, 52 percent or \$593 million, were in the form of loans, whereas \$547 million or 48 percent were in the form of scholarships, grants and work-study. Over the past five years, the total amount of financial aid distributed to state system students increased by \$370 million (48 percent) while the amount of student loans borrowed by state students increased by 52 percent.<sup>2</sup>

<b>Total</b>	<b>\$770</b>	<b>\$1,140</b>	<b>\$369</b>	<b>48%</b>

Institutions continue to rely on their foundations to secure private donations for the endowment of scholarship funds in order to provide scholarships to students to lessen the impact of tuition increases. Several institutions report that this high priority on fundraising has resulted in the acquisition of private donations which will fund several new annual student scholarship awards. Institutions continue to dedicate additional funding for student wages and on-campus jobs, established need-based, low interest and/or emergency student loan programs to assist students with special economic circumstances and those experiencing unexpected emergencies. Institutions offering innovative grant and scholarship programs and initiatives include:

- Rose State College offers *Ticket to Rose*, (previously called the *Mid-Del to Rose Scholarship Program*, established in FY08) which provides scholarships to students graduating from the Mid-Del School District. In FY14 it was expanded to include schools in eastern Oklahoma County and includes Choctaw High School. This scholarship covers any tuition and fees not covered by other federal and state financial aid programs and are designed to help meet the educational costs of financially challenged students. In addition, the institution has a program to pay the fees for any Oklahoma's Promise student that does not have another source of financial aid to cover these expenses. Additionally, Rose State College has implemented the "*Rent-A-Text*" through the Rose State College Bookstore program for fall 2010. Students can now rent textbooks through the program. It offers students 50 percent or more off the price of new textbooks and will provide an affordable alternative to rising education costs.
- Oklahoma State University, Oklahoma City will award scholarships to Westwood Elementary School students who are in the fifth grade during 2009, 2010, and 2011. Qualifying students must stay in school and graduate from the Oklahoma City Public School District, stay out of trouble, and apply for financial aid. Scholarships cover tuition, fees, and books.
- OSU-Oklahoma City has a *Bright Futures Program* geared toward incoming freshmen who are eligible for Oklahoma's Promise (OHLAP) funding. This program supplements OHLAP by providing additional financial assistance for fees and book assistance. Funds are limited; therefore, funding is provided on a first-come, first-served basis.

- Oklahoma State University continues the *Cowboy Covenant Program*, which was created to fill gaps in funding if Oklahoma's Promise (OHLAP) and other grants or scholarships. After other gift-aid has been deducted, this scholarship funds any gaps in tuition, most mandatory fees, and required textbooks during fall and spring semesters at OSU. The amount of additional scholarship funds provided through Cowboy Covenant may vary each year depending on changes in costs to attend OSU and other federal, state, OSU or private grants and scholarships the student receives. Oklahoma State University implemented the Centennial Housing Scholarships, designed to commemorate 100 years of Student Housing at Oklahoma State University. Thirty-two students in financial need received housing scholarships through this program.
- Cameron University continues its *Cameron Gold Program* to cover the costs of mandatory fees and book expenses for qualifying students who receive Oklahoma's Promise Scholarships. Cameron is in its second year of funding the textbook reserves program.
- Oklahoma City Community College continues its commitment to the *OKC-GO! Program* for students graduating from Oklahoma City Public Schools and the Western Heights school district. The program allows eligible students to receive free tuition for three years or 61 credit hours. The college also provides scholarships for OHLAP students' mandatory fee costs.
- In FY08, Rogers State University implemented the *Hillcat Promise*, which pays for fees and provides \$500 per semester for four years for academic expenses not covered by the *Oklahoma's Promise Scholarship Program*.
- Northeastern State University has implemented the *YES!Northeastern* program which will give freshmen up to \$500 per semester for four years for books, fees, and university housing to supplement Oklahoma's Promise scholarship program. In addition, NSU has increased its endowed scholarships through its foundation's Centennial Fund Drive. For FY14, Northeastern has had one of the best fundraising years in its history, further providing scholarship funds for students.
- The City of Alva Sales Tax Incentive continues to generate new funds to award students attending Northwestern Oklahoma State University.
- The University of Oklahoma's *Sooner Promise Scholarship* complements *Oklahoma's Promise Scholarship* and offers qualifying students an additional four-year scholarship which pays for mandatory fees and textbooks.
- The University of Oklahoma's *Sooner Heritage Scholarship Program*, in its eighth year, continues to help primarily middle income students with higher education costs. The scholarship has provided more than \$9.0 million in scholarships to over 16,575 students since its inception in FY04.

- The University of Oklahoma implemented a new program beginning in FY09 called the *OU Academic Success Rebate Program* which offers rebates at the end of the semester ranging from \$100 to \$400 on university housing for upper-class and graduate students based on their cumulative grade point average at the first of the semester. This is being implemented in an attempt to keep more high-achieving upperclassmen living on campus and benefiting from the advantages which living on campus offers, such as maintaining substantially higher GPA's and higher graduation rates.
- The University of Oklahoma, College of Law has implemented a \$5 million scholarship fund-raising campaign. These scholarships will be available to help offset an increase in the law student technology services fee. In FY09 more than \$1 million in private funds was used to provide financial assistance to OU law students.
- Tulsa Community College's *Tulsa Achieves Program* allows eligible high school graduates from Tulsa County to receive a financial aid award for 100 percent of tuition and fees, for up to 60 college credit hours, for any student living in Tulsa County and graduating from a public, private, or home high school with a 2.0 grade point average starting with the Class of 2007. The goal of the award is to increase the number of college graduates in Tulsa County. In FY09 there were 1,898 applicants with 512 students remaining in the program, and in FY14 there are 1,945 applicants. This program complements an existing program for high school students called *Attend College Early (ACE)* launched in 2004. It provides free tuition for eligible students who attend Tulsa Community College while concurrently enrolled in high school. Approximately 700-800 students enroll in the *ACE Program* each semester.
- *Tulsa Achieves Scholars* are eligible to participate in the *Tulsa Community College Textbook Trust Program*. This program offers allowances for purchasing textbooks for up to \$400 per scholar per semester for full-time *Tulsa Achieves Scholars* who are eligible for the need-based federal Pell Grant. TCC has also purchased textbooks for common classes and put them in its libraries. The *Tulsa Achieves Program* also provides the difference in what financial aid awards to a student, and what he/she needs to meet the cost of attendance. In addition, the College provides additional scholarships through the TCC Foundation.
- Tulsa Community College announced the creation of its *Second Chance Scholarship* in July 2009. The purpose is to provide an additional source of funding to support qualifying students and bridge the gap between funding they may receive from grants and other sources and the actual cost of tuition and books.
- Murray State College, like many others, has increased tuition waiver scholarships for FY14. The college also works with local Native American tribal personnel to assist students who may qualify for programs they offer; and solicit their foundation for additional scholarship resources.

- Southeastern Oklahoma State University implemented the *Textbook Reserve Program (TRP)* in an effort to help meet the needs of its students. The TRP is designed to help offset the financial burden imposed on students by making available, free of charge, required textbooks for basic courses. At least one of each of the required textbooks for all general education courses, all remedial courses, and the College Success Course are now available on reserve in the Henry G. Bennett Memorial Library on campus. All enrolled students are eligible to participate in the program and plans are being made for the program to be expanded in the future. At Southeastern, students are electing to take more on-line courses and IETV courses are being offered at off campus sites to reduce personal expenses and personal time associated with attending traditional classroom courses on the main campus.

The increase in Pell Grants with historically-low interest rates will minimize the impact of the cost of attendance on Oklahoma students. Institutions continue to help students discover all possible sources of funding and obtain any and all types of available assistance. They are committed to assisting students so that no student eligible for admission will be denied access because of the cost of attendance.

**Implementation of Cost-Effective Measures.** In an effort to maintain a standard of excellence, institutions continue to monitor their administrative and programmatic costs in order to maximize their operational budgets. They systematically review and evaluate academic programs' productivity, departmental spending, staff positions, etc. to ensure the most efficient use of funding. Some of their efforts include: 1) implementing energy management and conservation programs to save on utility costs, 2) studying and recommending ways to contain costs in health care and library acquisitions, 3) continuously reviewing and implementing "best practices" processes and procedures, 4) taking advantage of volume discounts for office supplies and equipment, 5) implementing electronic/paperless billing, payroll statements, and class information/materials, 6) closely scrutinizing purchases and travel requests, 7) pursuing outsourcing opportunities, 8) controlling adjunct costs by increasing the use of distance learning courses, 9) consolidating and/or eliminating positions, 10) implementing hiring freezes, and 11) saving on utilities by shifting to a four-day work week during the summer months. In addition, institutions are expanding their use of vehicles powered by compressed natural gas and expanding their reliance on wind power for energy as they strive to improve energy efficiency and adopt environmentally friendly programs.

In particular, most institutions indicate implementation of energy conservation programs in an effort to reduce utility costs as well as the impact on the environment and increase sustainability. System-wide estimated cumulative cost savings measures from FY09 – FY14 will generate \$411 million in cost savings. Initiatives include \$67.8 million in utilities savings, \$29.4 million in personnel changes and position eliminations through attrition, \$34.1 million in salary and benefit programs changes, \$37.6 in reductions in supplies, \$48 million saving in IT expenditures, \$6.2 million in transfers and other disbursements, \$4.0 million in travel reductions and other expenditures. Technology cost saving accounts for \$232 million over the past 5 years.

The State Regents mandate budgetary caps for institution's administrative expenditures. These range from 10 to 16 percent depending upon the institutional classification and are pegged to national and regional norms. For FY14, all institutional budgets are in compliance with their respective budgetary cap. System-wide, administrative expenditures comprise only 7.8 percent of the total budget.

Institutions are committed to exploring new programs and grant award opportunities to assist in providing program necessities and additional revenue. They remain dedicated to cost effective operations as they attempt to 1) provide sufficient faculty and classroom space to meet student demand for course sections, 3) work to keep the costs for health benefits manageable, and 4) address the increasing cost of utilities, library acquisitions, and technology in order to provide quality learning and research opportunities to students while maintaining efficiency and effectiveness.

**Communication with Students.** Institutions presented information to their Student Senates, Student Government Associations, student advisory groups, and other student groups, in open meetings of the student body at large, on their web sites, student newspapers and in public forums and tuition hearings explaining 1) the economic and budgetary concerns, 2) the potential tuition increase, and 3) how students, faculty and staff, and capital projects on campus might be impacted. Notices of meetings were publicized via e-mail to students, placed in the student and local newspapers, announced in classes by faculty, and communicated to other student organizations, as well as posted around campus in strategic locations frequented by all students. Student newspapers kept the student body informed on a continuing basis. Informational letters and e-mails were also sent to students explaining the increases and offering an opportunity to meet and discuss their concerns.

Presidents and their executive staff members discussed the issue at their President's Advisory Council meetings or other similar student leadership meetings and at student, faculty, and community open forums where people were encouraged to discuss the issues and voice their opinions. As expected, the general overall consensus of students was positive and supportive of the increase in tuition and mandatory fees in order to ensure the quality of instruction in Oklahoma higher education institutions is not compromised.

## State Regents' Initiatives

The State Regents currently have several initiatives related to public policy questions of tuition, affordability, and student information.

**Complete College America.** The State Regents have adopted college completion as their No. 1 goal. With a focus on promoting college readiness, transforming remediation, building bridges to certificates and degrees, expanding adult degree completion efforts, and rewarding progress and completion, Oklahoma can expect a 67 percent increase in the annual number of degrees conferred by 2023. Oklahoma's long-term commitment to performance funding, our focused efforts over the last decade to generate more college graduates for the workforce and our state leaders' embrace of the Complete College goals has led to Oklahoma being considered a national model for the 28 other CCA states to follow.

**Oklahoma's Promise.** Oklahoma's Promise is recognized by many as America's best college access program and is considered a model that combines emphases on academic preparation and financial support for college. Since 2001, OK Promise has grown from just over 2,000 qualifying students to about 20,000 students receiving scholarships in FY 2013.

**Reach Higher: Oklahoma's Degree Completion Program.** The State Regents initiated the Degree Completion Program, *Reach Higher*, in 2007, allowing working adults with at least 72 credit hours of college to earn a bachelor's degree in a flexible and accelerated format. Nine universities participate in the program, sharing curriculum, and collaboratively improving the program. The Association for Continuing Education (ACHE) awarded the *Reach Higher* program the 2009 Distinguished Program Award for Credit Programs. The ACHE also awarded the 2009 Great Plains Exceptional Program Award to the *Reach Higher* program. In 2010, the State Regents approved a collaborative associate degree program at twelve community colleges and the two technical branch campuses of OSU (in Oklahoma City and Okmulgee). This completion program targets students who earned at least 18 credit hours of college and need to complete an associate degree with a business or general education focus. Students choose among several Associate in Arts or Associate in Science degree programs or a Bachelor of Science in organizational leadership. With a Reach Higher degree, students receive the leadership training, communications skills and business knowledge they need to get ahead. As of 2013, the program has over 1,000 adult students enrolled across the state.

**OKcollegestart.org.** In spring 2007, the State Regents launched the comprehensive, web-based information system for prospective and current college students. The state's student information portal provides college planning and preparation information to students, parents and high school counselors. Through the site, students can create individual portfolios, access campus information, apply for federal and state financial aid, and apply to multiple colleges, preparing for the ACT, learning about career opportunities, and getting detailed information about the state's college campuses. The Web site is offered in English and Spanish and includes information about both public and independent Oklahoma colleges and universities. Financial aid information is also available, including an online application for the Oklahoma's Promise Scholarship program. An important feature of OKcollegestart.org is the site's Transcript Exchange System. This private, secure system allows high school counselors and students to send transcripts and apply quickly and easily to more colleges.

Since 2008, more than 379 high schools in the state have signed up upload electronic transcripts to OKcollegestart so that students can attach them and apply completely online to college. Approximately 286,265 user accounts have been created and there have been more than 6.04 million page views, with an average of 2,756 per day, since it was launched. Approximately 192,193 college applications have been received and approximately 44,749 students have applied online for Oklahoma's Promise Scholarship through this site.

**College Access Challenge Grants.** The State Regents received \$1,598,928 in FY14 from the U. S. Department of Education for the College Access Challenge Grant (CACGP). This grant program will provide over 600 scholarships to students who are near completion of a college degree and have demonstrated a need for financial aid. In Addition, this program will expand and enhance current initiatives aimed at increasing the number of college graduates. As in FY13, scholarships will be made available to students pursuing either a baccalaureate degree or an associate degree.

**Achieving Classroom Excellence (ACE).** Rigor of a high school student's high school curriculum is the biggest factor in determining whether a student will be successful in college. In 2005, the Oklahoma Legislature established the ACE project to better align high school curriculums with college entrance requirements. The State Regents provide financial support by funding the EPAS program, GEAR UP, the American Diploma Project, Summer Academies, the Student Information Portal, and Upward Bound as well as other programs that involve intervening at the high school level so students will be better prepared by the time they reach college.

**Concurrent Enrollment Tuition Waiver Program.** A tuition waiver program funded through state appropriations is available statewide for concurrently enrolled high school students. *Concurrent Enrollment Tuition Waivers* are awarded to eligible high school seniors for up to six credit hours per semester. This waiver represents tuition costs only and the students are responsible for payment of fees, books, and supplies. The program began as a pilot program in FY06 and was fully implemented in FY07. Through FY14, 82,932 seniors (duplicated headcount) have received over \$26.1 million in tuition waivers for a total of 377,318 credit hours of college instruction.

**Guaranteed Tuition Rates.** In May 2007, the Oklahoma Legislature passed House Bill 2103 authorizing four-year public colleges and universities to establish guaranteed tuition rates. First-time, full-time students will have the option to choose the guaranteed tuition rate and lock it in for four years beginning with the 2008-09 academic year. Each institution's guaranteed rate can be no more than 115 percent of their non-guaranteed rate. Mandatory fees are required in addition to tuition. In order to receive the guaranteed rate, students must maintain full-time enrollment during the fall and spring semesters. The goal of the legislation is to provide families with predictability in budgeting for college and encourage students to graduate on time.

**Cooperative Alliances.** Twenty-nine technology centers across the state have partnered with eighteen higher education institutions and branch campuses in cooperative alliance agreements. Cooperative alliance allowing students to earn college credit toward an associate of applied science degree or a college certificate while attending their local technology center.

As of spring 2013, 3,748 students enrolled in this program with more than 32,012 credit hours.

**Noel-Levitz Enrollment Management and Financial Aid Study.** In 2005 the State Regents contracted with Noel-Levitz consultants to conduct a system-wide review of Oklahoma's enrollment management practices and state-based student financial aid programs to determine if their financial aid resources are being used for the best possible outcomes for students. The review culminated in the two-day workshop *Best Practices in Marketing, Recruitment, Retention, and the Strategic Use of Financial Aid* detailing findings and providing the most current information about best practices. Findings include twenty-six recommendations categorized in two areas: 1) institutional recommendations and 2) statewide recommendations which institutions have begun to implement in order to increase the success of students. Institutions are following up with individualized enrollment management initiatives and continuation of best practices initiatives. In addition, a new student-level financial aid data collection system is being implemented and will be used in conjunction with the current Unitized Data System (UDS) to allow more detailed analysis of financial aid programs and utilization of financial aid.

**OK EPAS.** The Oklahoma Educational Planning and Assessment System provide assessments of college readiness and helps teachers, students and families identify the need for academic improvements. EPAS serves more than 450 school districts, including 84 nonpublic schools.

**OneNet.** Oklahoma's telecommunications network for education, government, and research provides high-speed communications to hundreds of public K-12 schools as well as career technology centers; public colleges and universities; public libraries; local, tribal, state and federal governments; rural health care delivery systems; and programs engaged in research.

**Student Loan Management Initiative, Ready Set Repay.** The Oklahoma College Assistance Program (OCAP), an operating division of the Oklahoma State Regents for Higher Education launches expanded student loan management initiative, *Ready Set Repay*, to further empower student loan borrowers to make smart borrowing decisions and successfully navigate student loan repayment. *Ready Set Repay* includes enhanced features and tools for students and schools, including new resources to help Oklahoma's higher education institutions maximize the effectiveness of debt education and default prevention efforts. The centerpiece of this initiative is OCAP's new student loan management website, [ReadySetRepay.org](http://ReadySetRepay.org).

## The National Perspective

**Tuition and Mandatory Fees Nationally.** The average published undergraduate resident tuition and mandatory fee rate nationwide for FY14 is \$8,893 at four-year institutions (\$247 or 2.9 percent higher than in 2012-13). The median increase was about \$270 for a full-time student at a four-year institution. Nationwide at two-year institutions, the tuition and fee rate is \$3,264 (\$110 or 3.5 percent higher than in 2012-13) for FY14 according to the College Board’s report *Trends in College Pricing 2013*.<sup>3</sup>

The Consumer Price Index increased by 2.0 percent between July 2012 and July 2013. After adjusting for inflation, the average tuition and fees nationally at public four-year institutions increased by 0.9 percent and increased 1.5 percent at public two-year institutions.<sup>4</sup>

<b>The College Board Key Findings Summarized</b>	<b>Public Four-Year College</b>	<b>Public Two-Year College</b>
Published FY14 Tuition and Fees	\$8,893	\$3,264
One-Year Dollar Increase	\$247	\$110
One-Year Percentage Increase	2.9%	3.5%
One-Year Percentage Increase After Inflation	3.4%	1.5%
Average Grant Aid and Tax Benefits per Student	\$5,770	\$4,810

In Oklahoma, the average undergraduate resident tuition and mandatory fee rate for FY14 is \$5,623 at public four-year institutions. At public two-year colleges the average is \$3,262.

<i>Oklahoma Average vs. National Average</i>			
<i>Sector</i>	<i>2013-14</i>	<i>Change from 2012-13</i>	
<i>Four-Year Institutions</i>	<i>Tuition &amp; Fees</i>	<i>Dollar Change</i>	<i>Percent Change</i>
National Average	\$8,893	\$247	2.9%
Oklahoma Average	\$5,623	\$242	4.5%
<i>Two-Year Colleges</i>	<i>Tuition and Fees</i>	<i>Dollar Change</i>	<i>Percent Change</i>
National Average	\$3,264	\$110	3.5%
Oklahoma Average	\$3,262	\$109	5.0%

The average published full-time undergraduate resident tuition and fees at public two-year colleges range from \$1,424 per year in California to \$7,090 in Vermont. At public four-year institutions, the range is from \$4,404 in Wyoming to \$14,665 in New Hampshire. Of the fifty states, Oklahoma two-year institutions rank 19<sup>th</sup> for the cost of tuition and mandatory fees and 13<sup>th</sup> at 4-year institutions (See Attachment 13).<sup>5</sup>

<sup>3</sup> “Trends in College Pricing 2013,” by The College Board, October 2013, p. 3, 13

<sup>4</sup> “Trends in College Pricing 2013,” by The College Board, October 2013, p. 9, 14

<sup>5</sup> “Trends in College Pricing 2013,” by The College Board, October 2013, p. 3  
 “Trends in College Pricing 2013 Online,” by The College Board, October 2013,  
<http://trends.collegeboard.org/college-pricing>

In addition to tuition and fees, students nationally pay an average of about \$9,498 in room and board if they live on campus or in equivalent housing and food costs if they do not. Student budgets also include about \$1,207 for books and supplies and \$3,228 for other expenses, such as transportation and miscellaneous living costs.<sup>6</sup>

Although it is generally the published prices that make the headlines, it is the net prices paid by individual students that matter most for college access and affordability. The net price of college is defined as the published price less the average grant aid and tax benefits students receive. On average, full-time students receive about \$5,770 in public four-year institutions and \$4,810 in public two-year colleges. Nationally, the estimated net price (taking into consideration funding received from grant aid and tax benefits) of tuition and fees paid by full-time students at four-year public colleges and universities in FY14 is about \$3,120 and at public two-year colleges the aid covers the average tuition and fees and provides about \$1,550 toward living expenses. When the cost of books and supplies and room and board are included, average grant aid covers approximately 51 percent of students' costs at Oklahoma community colleges and 46 percent of students' costs at four-year Oklahoma institutions, compared with 40 percent and 29 percent respectively nationwide.<sup>7</sup>

<sup>6</sup> “Trends in College Pricing 2013,” by The College Board, October 2013, Table 1, Figure 1

<sup>7</sup> “Trends in College Pricing 2013,” by The College Board, October 2013, Table 1, p. 4, 20, Figure 10

The University of Oklahoma, Oklahoma State University, and University of Science and Arts of Oklahoma are ranked in Kiplinger Magazine's 2013 Top 100 Best Values in Public Colleges. OU was ranked at 70<sup>th</sup> for in-state students, a drop from its 67<sup>th</sup> ranking in 2012. Likewise, OSU edged down slightly from 92nd in 2012 to 93rd this year. USAO edged up, climbing from 93rd in 2012 to 91st this year. Kiplinger bases its rankings on a combination of academics and affordability, using academic quality - including SAT or ACT scores, admission and retention rates, student-faculty ratios, and four- and six-year graduations rates. Then, each school is ranked on cost and financial aid. In Kiplinger's scoring system, academic quality carries more weight than.<sup>8</sup>

A recent national report on college affordability, coupled with new financial aid data from state higher education officials, shows that attending college in Oklahoma is highly affordable with great value. The U.S. Chamber of Commerce ranks Oklahoma higher education No. 7 nationally in affordability and No. 8 in efficiency. Its rankings are based on the evaluation of education costs, such as tuition, fees, books, and living costs, including room and board, as well as sources of funding support through student grants, loans, and individual tax benefits. The report also factored in each state's median household income.<sup>9</sup> U.S. News & World Report ranks the University of Oklahoma No. 101 and Oklahoma State University No. 141 in National Universities, and ranks University of Central Oklahoma No. 75 in Regional Universities (West) in the 2014 edition of Best College.<sup>10</sup>

The increase in average published tuition and fees at public four-year colleges and universities for the 2013-14 academic year is smaller than it has been in recent years and below the average growth rate for the decade from 2003-04 to 2013-14. Total state appropriations declined by 19 percent in 2012-13 from 2007-08, leaving this source of funding 27 percent below its level five years earlier while FTE enrollment in public institutions increased by 11 percent over these five years. Total state appropriations to public institutions declined by 11 percent in 2011-12 and by another 4 percent in 2012-13.<sup>11</sup>

Providing high-quality higher education is expensive, we must find ways to stem the growth in both the cost – the resources invested – and the prices paid by student and family. The wide variety of student aid programs and policies coupled with the average net price at public institutions should make a college education more affordable. Institutions are finding ways to offer high-quality education in a more cost-effective manner. State and federal governments are improving their systems for supporting both postsecondary institutions and the students they educate. The priority placed on investing in education will have to be greater at all levels of government, as well as among students and families, in order to improve the quality of education, prepare a better-educated labor force, create a healthier society and a stronger economy.

**National Availability of Financial Aid.** During 2012-13 (most recent data available), \$238.5 billion in financial aid was distributed to undergraduate and graduate students in the form of grants from all sources, federal work-study funds, federal loans, and federal tax credits and deductions. In addition, students borrowed \$8.8 billion in loans from state and private sources to help finance their education. A total of \$247.3 billion in financial aid was awarded.<sup>12</sup>

<b>Total Student Aid (in Millions)</b>					
<b>Source</b>	<b>2002-03</b>	<b>% of Total</b>	<b>2012-13</b>	<b>% of Total</b>	<b>% Change</b>

<sup>12</sup> "Trends in Student Aid 2013," by The College Board, October 2013, p. 10

Most students receive financial aid to help them pay the price of college. In 2012-13, undergraduate students received an average of \$13,370 in financial aid per full-time-equivalent student, including \$7,190 in grant aid and \$4,900 in federal loans, and \$1,280 in a combination of tax credits and deductions and Federal Work Study. Graduate students received an average of \$25,730 in aid, including \$7,800 in grant aid and \$16,240 in federal loans, and \$1,690 in a combination of tax credits and deductions and Federal Work Study.<sup>13</sup>

Total student aid increased by 87 percent in constant dollars over the decade from 2002-03 to 2012-13. Federal loans account for 41 percent of total student aid. Federal education tax benefits, introduced in 1998-99, constituted 8 percent of financial aid to postsecondary students. Education tax credits and deductions are pure subsidies, although the fact that the savings generally materialize months after the bills have been paid makes them less effective in facilitating college access.<sup>14</sup>

**Grant Aid.** Grant aid, which is a pure subsidy not requiring repayment, is the most desirable form of financial aid from the student's perspective. It comes from the federal government, state governments, employers, and other private sources, and from colleges and universities in the form of discounts from the published price. These sources have contributed fairly stable portions of total grant aid from 1998-99 to 2012-13. Grant Aid remains substantial level at 21 percent, 20 percent, and 19 percent of the total in 2010-11, 2011-12, and 2012-13 respectively.<sup>15</sup>

On average for 2012-13, full-time students at public four-year institutions receive a total of approximately \$5,770 in grants and tax benefits and students at two-year colleges receive about \$4,810. As noted previously, after applying grant aid, the average full-time student would pay an average net price of about \$3,120 for tuition and fees at a four-year institution and at a two-year colleges this aid covers tuition and fees and provides about \$1,550 toward living expenses.<sup>16</sup>

Federal grants represent 41 percent of total grant aid. Pell Grants are the foundation of the aid system and are intended to provide access to postsecondary education for those least able to afford it. The maximum Pell Grant remains at \$5,550 in 2012-13 since its increase in 2010-11, it was \$5,350 in 2009-10, \$4,731 in 2008-09, \$4,310 in 2007-08, after remaining at \$4,050 from 2003-04 through 2006-07. Pell Grants increased from \$14.8 billion in 2002-03 to \$32.3 billion in 2012-13 while the number of students receiving these grants increased from 20.7 million to 24.8 million respectively over the decade, and decreased from 25.5 million recipients in 2011-12, an increase of 3 percent over the previous year. The average grant per recipient was \$3,650<sup>17</sup>

The Academic Competitiveness Grant (ACG) program, SMART Grants, and Leveraging Education Assistance Partnership (LEAP) formerly known as the State Student Incentive Grant (SSIG) program are no longer available. Funding for these programs was ended in 2010-11 academic year.

<b>Total Federal, State, Institutional Grant Aid</b>	<b>\$58,871</b>	<b>100%</b>	<b>\$115,724</b>	<b>100%</b>	<b>97%</b>
Federal Work-Study	\$1,279	16%	\$978	5%	-24%
Education Tax Benefits*	\$6,690	84%	\$20,280	95%	203%
<b>Total Additional Federal Benefits</b>	<b>\$7,969</b>	<b>100%</b>	<b>\$21,258</b>	<b>100%</b>	<b>167%</b>
<b>Combined Total</b>	<b>\$66,840</b>		<b>\$136,982</b>		<b>105%</b>

State grant aid provided approximately 8 percent of total grant aid in 2012-13, while the largest portion of grant aid, 41 percent, came from Federal grants, 38 percent came from college and universities, and 13 percent came from employers and private sources.<sup>18</sup>

The American Opportunity Tax Credit (AOTC) introduced in 2009, increased the total tax savings for college students and their parents claiming education credits and tuition deductions from totaling \$20.3 billion in 2011. More than 10 million taxpayers benefited from federal education tax credits and deductions totaling \$7.0 billion in 2008 to \$15.4 billion in 2009 and to \$18.8 billion in 2010. Unlike most other forms of student aid, tax credits and deductions cover only tuition and fees. The federal government also allows tax deductions for interest paid on student loans. In 2011, 8.2 million taxpayers with taxable returns deducted about \$8 billion in student loan interest, generating over \$1.4 billion in savings.<sup>19</sup> The American Opportunity Tax Credit was originally to expire at the end of 2010, yet was extended for an additional two years through December 2012 by the Tax Relief and Job Creation Act of 2010.<sup>20</sup>

**Loans.** The federal government was the primary source of education loans with the Stafford Loan Program being the major source of federal education loans. In 2012-13, total federal education loans decreased from \$109.8 billion to \$101.5 billion, or approximately \$8.3 billion. This 7.6 percent decrease in federal education loans was accompanied by an increase of approximately 8.4 percent in nonfederal education loans.<sup>21</sup>

The private loan market is an important supplementary source of funds for students. The recent difficulties facing credit markets in general, combined with decreases in the availability of federal loans and state sponsored loans for students are reflected in the increase use of private education loans in 2012-13 private loan volume increased 1 percent from \$6.4 billion in 2011-12 to \$7.2 billion in 2012-13. Private education loans decreased from about 14

<sup>18</sup> "Trends in Student Aid 2013," by The College Board, October 2013, p. 10

<sup>19</sup> "Trends in Student Aid 2013," by The College Board, October 2013, p. 3, 27

<sup>20</sup> "IRS-American Opportunity Tax Credit" <http://www.irs.gov/uac/American-Opportunity-Tax-Credit>

<sup>21</sup> "Trends in Student Aid 2013," by The College Board, October 2013, p. 10

percent of total educational borrowing in 2002-03 to 7 percent in 2012-13. The 16 percent increase in nonfederal loans represents a \$1.7 billion decrease from \$10.5 billion in 2002-03 to \$8.8 billion in 2012-13. The 86 percent increase in federal loans represents a \$46.8 billion increase from \$54.7 billion to \$101.5 billion. Concern over increasing student reliance on debt to finance postsecondary education is frequently reflected in discussion of the changing “grant/loan ratio.”<sup>22</sup>

In 2012-13, federal loans constituted 37 percent and federal grants constituted 24 percent of the \$185.1 billion in student aid received by undergraduate students. Federal loans constituted 63 percent of the \$53.4 billion in student aid received by graduate students. Federal grants accounted for only 3 percent of graduate student aid.<sup>23</sup>

<b>Student Loans (in Millions)</b>					
<b>Source</b>	<b>2002-03</b>	<b>% of Total</b>	<b>2012-13</b>	<b>% of Total</b>	<b>% Change</b>
Federal Loans	\$54,670	84%	\$101,469	92%	86%
State Sponsored Loans	\$1,610	2%	\$1,610	1%	0%
Private Sector Loans	\$8,900	14%	\$7,200	7%	-19%
<b>Total Student Loans</b>	<b>\$65,180</b>	<b>100%</b>	<b>\$110,279</b>	<b>100%</b>	<b>69%</b>

In 2012-13, approximately 87 percent of FTE students were undergraduate students and 13 percent were graduate students. Grants constituted 52 percent of the funds used by undergraduates to supplement student and family resources, compared to 30 percent for graduate students. Loans constituted 39 percent of the funds for undergraduates, compared to 64 percent for graduate students.<sup>24</sup>

Although costs and the current state of the economy are concerning to many, 85 percent of parents and 64 percent among all families strongly agreed that college is an investment in the future. Students assumed direct responsibility for 29 percent of the total cost of college. Grants and scholarships covered 30 percent of college costs in 2012-13.<sup>25</sup>

**Other Forms of Student Aid.** State sponsored Section 529 college savings plans and prepaid tuition accounts are other forms of student aid. Eighty-nine percent of funds in these accounts are in standard savings accounts and 11 percent are in prepaid tuition accounts. The total number of Section 529 accounts at June 30, 2013 was 11.4 million with an average value of \$18,000. The total assets in the Section 529 plans reached an all-time high of \$205.7 billion in June 2013. Other forms of savings for education that are granted special tax status by the federal government include Series EE and Series I Savings Bonds and Coverdell Education Savings Accounts, as well as IRA withdrawals for education expenses.<sup>26</sup>

Other significant subsidies to students through the tax code include the personal exemption allowed for students ages 19 and over, which saved parents about \$4 billion in 2011-12, and

<sup>22</sup> “Trends in Student Aid 2013,” by The College Board, October 2013, p. 10

<sup>23</sup> “Trends in Student Aid 2013,” by The College Board, October 2013, p. 12, 13

<sup>24</sup> “Trends in Student Aid 2013,” by The College Board, October 2013, p. 12, 13, 15

<sup>25</sup> “How America Pays for College 2013,” by Sallie Mae and Ipsos, August 2013, p. 6, 15

<sup>26</sup> “Trends in Student Aid 2013,” by The College Board, October 2013, p. 32

the excludability of tuition assistance from employers, which saved students about \$1 billion.<sup>27</sup>

**FTE Enrollment.** The State Higher Education Executive Officers (SHEEO) reports that since 1987 to 2012, FTE enrollments in public institutions have increased from 7.1 million to 11.5 million. The all-time peak enrollment occurred in 2011 or 0.7 percent slightly higher than in 2012.<sup>28</sup> The long-term enrollment trend for public institutions indicates continued growth. Enrollment grew rapidly from 2002 to 2005, and then more modestly in 2006 and 2007, growth accelerated again between 2007 and 2011, tapering off slightly in 2012. In 2012, FTE enrollments reflected a national decrease of 78,000 students, or 0.7 percent below 2011.<sup>29</sup>

Educational appropriations per FTE reached a high of \$8,670 in 2001, following four years of decline in 2002, 2003, 2004, and 2005, increased in 2006, 2007, and 2008, recovering to \$7,781 and then declining each of the last four years to \$5,906 in 2012. Appropriations per FTE were lower in 2012 than in any year since 1980.<sup>30</sup> Total educational revenue per FTE grew steadily from 1994 to 2001, reaching \$12,267, then fell sharply from 2001 to 2004 to \$11,067, rebounded to \$12,067 by 2008, fell to \$11,276 by 2011, and falling again to \$11,095 in 2012.<sup>31</sup>

There are no signs of decline in the demand for higher education. Nationally, FTE enrollment grew 15.6 percent in the past five years and the total public FTE enrollment increased by 34.2 percent since the beginning of the 21<sup>st</sup> century.<sup>32</sup>

The Delta Cost Project released a market-based methodology for estimating productivity in state public higher education systems and compares the results across the states. Oklahoma ranks 13<sup>th</sup> lowest in cost per FTE student and Oklahoma is also ranks as a top-performer in the number of certificates and degrees awarded per 100 FTE students, 28 compared to the national average of 23.<sup>33</sup>

**Funding Pressures.** A weak economy has put increasing pressure on state and institutional budgets in recent years. State appropriations for higher education have not been able to keep pace with increases in enrollment, and college prices continue to rise faster than average prices in the economy. State appropriations are a major source of revenue for public colleges and universities, yet have been steadily declining.

# State Cuts to Higher-Ed Funding FY08 - FY13

(Illinois State University, Grapevine)

Source: Grapevine: An Annual Compilation of Data on State Fiscal Support for Higher Education

During the past decade, the average share of revenues coming from state and local appropriations decreased, and the average share of revenues coming from net tuition increased for public institutions. Total state appropriations for public colleges and universities declined from \$73.2 billion in 2011-12 to \$72 billion in 2012-13.<sup>34</sup>

Nationally in FY12, tuition and fees accounted for approximately 43 percent of total revenue.<sup>35</sup> In Oklahoma tuition and fees accounted for 41.6 percent in FY11, 43.1 percent in FY12, 44.9 percent in FY13, and 45.8 percent in FY14.<sup>36</sup> Real dollar increases in tuition charges have largely “replaced” state revenues, leading to considerable growth in the percentage of costs borne by students and families.

State higher education appropriations declined by 7.9 percent nationally in FY12. Total funding for 2013 is approximately \$1.1 billion less than provided in 2012. Despite above-average enrollment and growth in tuition revenue per student, the broadly recognized pressures and budgetary stresses on public resources compound the financial challenges colleges and universities are facing.<sup>37</sup>

States are facing the fact that revenues lost during the past few years of economic downturn will not come back and that they could face several more years of fiscal challenges. Tax revenues will not return to 2008 levels in most states until 2014, and even after that point it is believed that economic growth will be at a much lower level than seen before the recession. State revenue has fallen at an unprecedented rate and full recovery will, at best, take many years. This outlook suggests that 2014 is likely to be a highly challenging budget year.<sup>38</sup>

**The Consumer Price Index for Urban Consumers.** The student, parent, or student aid provider most often views higher education prices compared to how much consumers pay for other goods and services. The Consumer Price Index for Urban Consumers (CPI-U) is most often used for such comparisons. The CPI-U “market basket” consists of: housing (42 percent), transportation (19 percent), food and beverage (18 percent), apparel and upkeep (7 percent), medical care (5 percent), entertainment (4 percent), and other goods and services (5 percent). To calculate the CPI-U, the Bureau of Labor Statistics measures average changes in the prices paid for these goods and services in 27 local areas. While consumers' prices grew by 43 percent between 1995 and 2010, the cost of medical care grew by 85 percent, and enrollment-weighted tuition and fees for four-year public universities grew by 175 percent. U.S. income per capita grew by 85 percent during the same period.

The CPI-U is based on goods and services purchased by the typical urban consumer. Colleges and universities spend their funds on different things – about 75 percent on salaries and

<sup>37</sup> “Trends in Tuition and Fees, Enrollment, and State Appropriations for Higher Education by State” by College Board Advocacy & Policy Center, July 2012

<sup>38</sup> “State Higher Education Finance FY2012,” by State Higher Education Executive Officers (SHEEO), March 2012, p. 12, p. 35 Table 7

“Grapevine, An Annual Compilation of Data on State Fiscal Support for Higher Education “  
<http://www.grapevine.ilstu.edu>, Table 1

benefits for faculty and staff, and lesser amounts on utilities, supplies, books and library materials, and computing. Trends in the costs of these items don't necessarily run parallel to the average price increases tracked by the CPI-U.<sup>39</sup>

**The Higher Education Price Index.** The Higher Education Price Index (HEPI), a widely used measure of colleges' costs compiled since 1961 by The Commonfund Institute, rose by 1.7 percent for the 2012 fiscal year compared to a 2.2 percent for 2009, a 0.9 percent for the 2010, and a 2.3 percent for the 2011. The HEPI is derived by calculating the change in the costs of eight categories of goods and services that colleges pay for in the course of the year. Salaries and related costs make up five of the categories and 85 percent of the costs. Utilities count for seven percent, and supplies and materials six percent.

In 2008, for the first time since 1995, the annual increase in the index was smaller than that of the Consumer Price Index (CPI), which went up 3.7 percent for the same period and is more heavily influenced by increases in costs for housing, transportation, and food. In 2012, the HEPI (64 percent per SHEEO) was again more than the CPI-U (43 percent per SHEEO), which remains the same as historically has been the case.<sup>40</sup>

**The Higher Education Cost Adjustment.** The State Higher Education Executive Officers (SHEEO) developed the Higher Education Cost Adjustment (HECA) as an alternative to the CPI-U and the HEPI for estimating inflation in the costs paid by colleges and universities. HECA is constructed from two federally developed and maintained price indices – the Employment Cost Index (ECI), which reflects employer compensation costs, and the Gross Domestic Product Implicit Price Deflator (GDP IPD), which reflect general price inflation in the U. S. economy. The HECA is based on a market basket with two components – personnel costs (75 percent) and non-personnel costs (25 percent). As estimated by HECA, provider prices for higher education grew by 53 percent between 1997 and 2012.<sup>41</sup>

**Enrollment Projections.** The National Center for Education Statistics, a branch of the United States Education Department, reports in *Projections of Education Statistics to 2021* released in January 2013, that total enrollment in degree-granting institutions increased 46 percent from 1996 to 2010 and total enrollment in postsecondary degree-granting colleges and universities is expected to increase 15 percent, to 23 million, from 2010 to 2021.<sup>42</sup>

Projected increases in the college age population, the increasing economic importance of education, and survey data on student aspirations all suggest the demand for higher education will continue to increase for the foreseeable future in the United States. In recent experience, when state and local support has failed to match enrollment growth and inflation, an increasing share of the cost has been shifted to students and their families. Students and their families have borne a substantially larger share of higher education costs over the past decade.<sup>43</sup>

<sup>43</sup> "The Great Cost Shift, How Higher Education Cuts Undermine The future Middle Class" by John Quintero, on Demos, April 2012

In 2012, 66.2 percent of recent high school graduates were enrolled in college or universities, the US Bureau of Labor Statistics reported. Among high school graduates enrolled in college in October 2012, 87.8 percent were full-time students. About 7 in 10 recent high school graduates enrolled in college attended 4-year institutions. In 2012, 58.6 percent of the nation's population between age of 16 and 24 (22.7 million) were either enrolled in high school (10 million) or in college (12.7 million). About 85 percent of college students were enrolled full time. The unemployment rate for high school students, at 28.8 percent in October 2012, was more than four times the rate for college students at 7.1 percent.<sup>44</sup>

According to an analysis by the Western Interstate Commission for Higher Education, the number of high school graduates nationwide peak occurred in 2010-11 with slightly fall the immediate term, before setting down at a stable rate by 2012-13. The next period of sustained growth will begin in 2020-21 and continue through 2026-27. The graduating classes of public high schools are rapidly growing diversity as the data indicates that minorities will account for all the growth in high school graduates projected at 45 percent of the nation's public high school graduates by 2019-20 compared to 38 percent in 2009. Postsecondary institutions need to be aware of these trends and how they might impact curriculum and preparation, support services, the demand for higher education, and affordability.<sup>45</sup>

**College Affordability.** A national trend over the last 30 years has seen the burden of financing higher education shift from the state to the student. Since 2008, state funding to higher education has dropped 28 percent, while tuition at public four-year universities has increased 27 percent. Nearly two out of three college students owe an average of \$26,600. The cost of attending a public four-year college has almost doubled over the last 20 years. Every year, approximately 400,000 qualified high school graduates cannot afford to go on to college. Congress passed the College Cost Reduction and Access Act it helped to make the dream of higher education a reality for most low- and middle-income students.<sup>46</sup>

**Higher Education Reauthorization Act.** President Bush signed the bill reauthorizing the Higher Education Act (HEA) on August 14, 2008. Congress passed legislation reauthorizing the Higher Education Act. The new law (Pub. L. 110-315), which was signed by president Obama on August 14, 2012, includes many positives for higher education. The act includes new reporting, disclosure, and other requirements along with various provisions aimed at the rising cost of postsecondary education, such as 1) increasing the purchasing power of Pell Grants by raising the maximum award to \$6,000 (from \$4,310) followed by increases of \$400 in subsequent years to reach \$8,000 in academic year 2014-2015, 2) addressing the growing crisis of affordable textbooks by balancing students' abilities to manage costs through advanced planning with respect for faculty's legitimate academic freedom concerns, 3) creating the Patsy T. Mink Fellowship Program to help minorities and women enter the professoriate, 4) authorizing scholarships, support programs, and counseling for community college students to help them stay in school and, if possible, enroll in a four-year school, 5) protecting collective bargaining rights, and 6) rejecting any mention of "merit pay."<sup>47</sup>

<sup>46</sup> "College Affordability" by National Education Association

<sup>47</sup> "Congress Passes Higher Education Reauthorization Bill" by National Education Association, August 2012

**Higher Education Reform.** President Obama presented a plan for the reform of higher education. The plan targets three major areas of reform: paying colleges and students for performance, promoting innovation and competition, and ensuring student debt is affordable. To establish a new rating system focused on identifying colleges that provide the best value for students and incentivizing colleges to place a priority on serving more low-income disadvantaged students and to tackle the sources of rising college costs through a \$1 billion *Race to the Top* (RTT) fund attempts to “reshape the federal-state partnership” and incentivize state-level innovation and funding. The plan also supports the expansion of competency-based models, which allow students to get credit for learning based on the competencies rather than the number of hours spent in a classroom. The plan supports innovation to make college more affordable for the millions of student who could benefit from postsecondary education and training.<sup>48</sup>

**Community College Support.** Politically, community colleges, a uniquely American educational model, have received greater visibility and more substantive support than at any time in their history. President Obama proposed the *American Graduation Initiative* to invest in community colleges and help American workers get the skills and credentials they need to succeed. The Health Care and Education Reconciliation Act includes \$2 billion over four years for community college and career training. These resources will help community colleges and other institutions develop, improve, and provide education and training, suitable for workers who are eligible for trade adjustment assistance. The initiative will be housed at the Department of Labor and implemented in close cooperation with the Department of Education. The Federal American Graduation Initiative is calling for an additional 5 million student to graduate from community colleges by 2020.<sup>49</sup>

A report from the 21<sup>st</sup>-Century Commission on the Future of Community Colleges by American Association of Community College suggested community colleges are the gateway in reclaiming the American dream of higher education. Attending community colleges improve college readiness for higher school graduates that dramatically reduce numbers of students entering college unprepared for rigorous college-level work and double the number of students who complete developmental education programs and progress to successful completion of related freshman-level courses. By redesigning students’ educational experiences, community colleges also have the great potential to close the American skills gaps by sharply focusing career and technical education on preparing students with the knowledge and skills required for existing and future jobs in regional and global economies.<sup>50</sup>

<sup>48</sup> “President’s Plan to Make College More Affordable: A Better Bargain for the Middle Class”, by White House , August 22, 2013

<sup>49</sup> “Building American Skills Through Community Colleges”, by White House

<sup>50</sup> “Community Reclaiming the American Dream” a report from the 21<sup>st</sup>-Century Commission on the Future of Community College, by American Association of Community College, April 2012.

**Miscellaneous.** More than four years after the U.S. economy emerged from recession, most municipal governments haven't returned to their revenue and employment levels from before the downturn. The Federal government shutdown in October 2013 along with leaving America's debt crisis unaddressed by increasing debt ceiling will have long term effects on higher education. The pressure on colleges will be greater even when the economy rebounds as all the usual sources of support are likely to be less able to provide resources.<sup>51</sup>

Over the decade from 2003-04 to 2013-14, dollar increases in average public four-year tuition and fees ranged from \$1,955 in the middle states region to \$4,048 in the West. Percentage increases ranged from 26 percent in the middle states region to 86 percent in the West. When room and board are included, total charges at public four-year institutions rose more rapidly between 2003-04 and 2013-14 than they did during either of the two preceding decades.<sup>52</sup>

The State of California enrolls about 9 percent of the nation's full-time public four-year students and 20 percent of the nation's full-time public two-year students. 13 percent of all full-time equivalent enrollments (FTE) in degree-granting public institutions in the U.S. are in California colleges and universities. Over the five years from 2008-09 to 2013-14, California's published in-state tuition and fee increases of 111 percent at public two-year colleges, Although it raised the national average markedly, California still has the lowest price on tuition and fees in the country.<sup>53</sup>

The sharp declines in per student state appropriations in recent years have been accompanied by rapid increases in public four-year college tuition and fees. In 2012-13, appropriations fell less than in the preceding four years, and tuition and fees rose less than in the preceding three years. State appropriations per \$1,000 in personal income declined from \$9.74 in 1989-90 to \$7.03 in 2002-03, to \$6.59 in 2007-08, and to \$5.42 in 2012-13. In other words, the portion of state resources going to support higher education has declined steadily in recent decades.<sup>54</sup>

Changes in appropriations per FTE student between 2007-08 and 2012-13 ranged from declines of 51 percent in Arizona and 45 percent in Oregon to increases of 5 percent in Illinois, 9 percent in Wyoming, and 11 percent in North Dakota. From 1991-1992 through 2012-13, the State of New Hampshire had the lowest appropriations relative to personal income and the State of New Mexico had the highest appropriations relative to personal income.<sup>55</sup>

Financial woes brought on by global economic weakness have been especially hard on higher education institutions, which rely on three major funding streams: state appropriations, school endowments and tuition. In addition to declining appropriations, university endowments have received fewer gifts and experienced massive investment losses. With two of the three major funding sources down, many state policymakers turned to the only remaining source and raised tuition, thereby increasing the proportion that students and families pay for college.<sup>56</sup>

<sup>53</sup> "Trends in College Pricing 2013," by The College Board, October 2013, p. 33, 4

<sup>54</sup> "Trends in College Pricing 2013," by The College Board, October 2013, p. 24, 25

<sup>55</sup> "Trends in College Pricing 2013," by The College Board, October 2013, p. 25

<sup>56</sup> "Declining Investment in Higher Education Hurts Students," by U.S. News, Education, April 18, 2012.

**How America Pays for College.** According to the national study *How America Pays for College 2013*<sup>57</sup> by Sallie Mae and Ipsos released in August 2013, college-going students and their parents:

- Eighty-five percent of parents strongly believe that higher education “is an investment in the future”, the highest proportion seen in the last five years, it was 77 percent in 2012; 64 percent of family agreed college is essential for higher lifetime earnings for the student’s future career.
- While most families expressed financial concerns and are cost-consciousness about paying for college, parents’ willingness to stretch financially to pay for the college has increased to 58 percent in 2013, from 53 percent in 2012.
- In 2013, slightly fewer families than in 2012 reported having rejected schools due to cost, 67 percent of families eliminated colleges choices based on cost, down from 69 percent in 2012.
- Drawing from savings, income and loans, students paid 29 percent of the college costs compared to 30 percent in 2012, while parents covered 36 percent of the costs compared to 37 percent in 2012.
- Families are being resourceful by cutting college and living expenses. The average family is spending 12 percent less for college and parents’ average out-of-pocket spending has declined 34 percent compared to in 2010.
- Families took cost-savings measures to make college more affordable. Forty-seven percent of students working more hours, 27 percent of students accelerated course work to spend fewer semesters earning a degree, 57 percent of students living at home or with relatives, and 19 percent of students have changed majors to pursue a more marketable field to study.
- In 2013, financial aid covers a bigger portion of college costs than it has in the past. Grants and scholarships made up 30 percent of the total amount to meet college costs compared to 23 percent in 2010.
- More families utilized scholarships at 39 percent in 2013, up from 35 percent in 2012. Grant usage remained elevated as 45 percent of families qualified for grants.
- Thirty-two percent of students borrowed education loans to pay for college in 2013: 22 percent borrowing federal loans only, 7 percent using a mix of federal and private loans, and 2 percent tapping private loans only.

### *How the Average Family Pays for College*

<sup>57</sup> “How America Pays for College 2013,” by Sallie Mae and Ipsos, August 2013.

**Other Factors.** The Wall Street credit crisis has made many families concerned about student loan availability. The Federal Stafford Loan with a low fixed interest rate at 3.86 percent has increased borrowing limits up to \$12,500 per year and is available to families, regardless of income and credit history. U.S. Department of Education’s William D. Ford Federal Direct Loan Program provides students and family access to low-interest federal student loans.<sup>58</sup>

Total outstanding student loan debt officially surpassed total credit card debt in the United States in 2010, and is estimated to exceed \$1 trillion in 2013. The Obama Loan Forgiveness Program was introduced on March 8, 2012. The loan forgiveness act caps payments at 10 percent of the borrower’s income. The plan provides forgiveness for ten years in the event of economic hardship. Students may have up to \$45,520 in loans forgiven.<sup>59</sup>

The maximum Pell Grant award has raise from \$5,550 to \$5,635 in 2013-14 with 9.5 million students receiving Pell Grants. Income-based repayment (IBR) may benefit 3.5 million students who are eligible to take advantage of a new option to cap repayment of student loans at 10 percent of monthly income.<sup>60</sup> Students who take responsibility for their loans by making monthly payments will have remaining balances forgiven after 20 years of payments or forgiven after 10 years for those who serve in public service.<sup>61</sup>

Colleges have often considered themselves recession-proof, just as the economic recovery allowed some colleges to add some extra padding to their budgets in 2012-13, stagnant endowment returns and enrollment decline resulted in tuition revenue decreases. Public colleges got some good news as 30 state governments allotted more tax dollars to higher education in the 2013 fiscal year, which came as a welcome reprieve after repeated budget cuts. Institutions have implemented hiring freezes, halted building projects not already approved, and dipped into their endowments. Colleges have cut discretionary spending and stopped investing in staff and infrastructure until the economy is fully recovered.<sup>62</sup>

College graduates have suffered through the recession and lackluster recovery with remarkable resilience. The unemployment rate for college graduate in April 2013 was 3.9 percent compared with 7.5 percent for the work force as a whole. The number of college-educated workers with jobs has risen by 9.1 percent since the beginning of the recession. In 2012, the full-time worker with a bachelor’s degree earned 79 percent more than a full-time worker with a high school diploma, in comparison, 20 years ago the premium was 73 percent, and 30 years ago it was 48 percent. The return on investment on a college degree remains high it equivalent to an investment with annual return of 15.2 percent, that is more than double the average return to stock market since 1950 and more than five times the returns to corporate bonds, government bonds, homeownership, or gold.<sup>63</sup>

## Performance Funding for Higher Education

In traditional enrollment-based funding models, colleges receive state funding based on the number of full-time equivalent students enrolled at the beginning of the semester. Such a model provides incentives for colleges to enroll students but not necessarily in helping students graduate. Many states are reconsidering the typical enrollment-based funding models and have developed reinvented performance-based funding models that allocating money to colleges based on the number of students who complete courses and degrees.

Twelve states - Illinois, Indiana, Louisiana, Michigan, Minnesota, New Mexico, Ohio, Oklahoma, Pennsylvania, South Dakota, Tennessee and Washington - have a funding formula in place that provides some amount of funding based on performance indicators such as course completion, time to degree, transfer rates, the number of degrees awarded, or the number of low-income and minority graduates. Four states are transitioning to some type of performance funding, meaning the Legislature or governing board has approved a performance funding program and the details are currently being worked out. Several more states have had "formal discussions" about performance funding. This means that there have been formal hearings held at the Legislature or meetings conducted by governing boards on the topic.

Knowledge about the effectiveness of performance-based funding is limited at this initial stage. In the past, the amount of funding allocated to colleges based on performance was not significant enough to make a difference. Not until recently have states begun allocating larger amounts for this purpose. Arkansas, for example is beginning at just 5 percent of higher education funding but increasing the amount to 25 percent over five years. Tennessee will be the first state to base 100 percent of higher education funding on course completion and other performance indicators.

Although the effectiveness of a performance-based funding formula is not yet well known, there is some evidence of success. In Pennsylvania, four-year institutions have received performance-based funding for the last decade. During that time, graduation rates have increased by about 10 percentage points, and retention rates for Hispanic students have increased by 15 percentage points.

Oklahoma has successfully adopted a revised performance-funding formula that allocates a percentage of the overall budget for higher education based on performance and outcomes. In 2008, performance-based funding averaged \$2.2 million a year. The focus of the incentives is on student retention, graduation, and degree completion. The Board of State Regents in April 2012, voted to approve a revised and expanded funding formula for new money, or any funding the system receives beyond its current base level. The revised formula rewarded schools for student retention and degree completion.

*Source: Performance Funding for Higher Education,  
<http://www.ncsl.org/research/education/performance-funding.aspx>*

## Complete College America

The State Regents have adopted college completion as their number one priority. With a focus on promoting college readiness, transforming remediation, building bridges to certificates and degrees, expanding adult degree completion efforts, and rewarding progress and completion, Oklahoma can expect a 67 percent increase in the annual number of degrees conferred by 2023. Oklahoma's long-term commitment to performance funding, our focused efforts over the last decade to generate more college graduates for the workforce and our state leaders' embrace of the Complete College goals has led to Oklahoma being considered a national model for the 28 other CCA states to follow.

- **Focus on College Readiness**  
Higher education and K-12 are working together to develop and implement strategies that focus on better preparing students in high school for success in college. Enhancements in academic activities in the 11th and 12th grades will be made to reduce the need for remediation.
- **Transform Remediation**  
Oklahoma public higher education institutions are implementing programs in the areas of math, language skills and reading that will dramatically improve developmental programs and reduce the time it takes to earn a degree.
- **Strengthen Pathways to College Certificates and Degrees**  
Our colleges and universities are implementing programs that create clear pathways to certificates and degrees, including cooperative alliance agreements with career technology centers and new CCA-pioneered techniques to provide electronic degree checklists, advising and academic support.
- **Increase Degree Completion**  
The Reach Higher program provides degree completion opportunities to students who have some college credit but have not completed an associate or bachelor's degree. The program is being expanded to include college certificates.
- **Reward Performance**  
In April 2012, the State Regents adopted a performance-based funding formula providing incentives to institutions that increase their degree completion rates in addition to other performance factors.

*Source: Oklahoma State Regent's For Higher Education, <http://okhighered.org>*

## Is a College Education Still Worth the Investment?

The State Regents' FY14 Student Cost Survey indicates that the cost of four years of undergraduate resident tuition, fees, books and supplies at an Oklahoma public college or university at current rates cost less than \$37,210. With the addition of room and board, that total rises to less than \$66,662 in Oklahoma. (These amounts do not include any grant aid or tax benefits students may be eligible for.)

The survey results of a Gaining Early Awareness and Readiness for Undergraduate Programs (GEAR UP) indicates that 94 percent of Oklahoma parents expect their children to attend college. It also indicates that 82 percent of families with household incomes of less than \$20,000 expect their children to attend college. The increase in expectations is in part due to an increase in the perceived value of a college degree.

In recent years, there has been a dramatic growth in the perception that college is not only important but is absolutely essential for success in today's economy and nearly nine in ten Americans have come to regard access to higher education as a virtual right. The American Community Survey reports that America is becoming increasingly educated with more than one in four United States residents now having a college degree. And the Center on Education and the Workforce predict that by 2018, 63 percent of all jobs will require some postsecondary education.<sup>64</sup>

The recent recession affected workers very differently, depending on their level of education attainment; less-educated workers lost nearly four out of five jobs during the recession. Those with a high school diploma or less need 5.8 million more jobs to reach their prerecession employment level, while workers with a Bachelor's degree or better have 2.2 million jobs over their prerecession level. The average earnings of a Bachelor's degree-holder remain nearly twice as much as those of a worker with only a high school diploma. In addition, employers are willing to pay more for educated workers as they see great value and added benefit in such workers.<sup>65</sup>

The average lifetime earning of a Bachelor's degree holder is \$2.3 million, 84 percent more than that earned by high school graduates, up from 75 percent in 1999. Over a lifetime, a Bachelor's degree holder expects median lifetime earnings of \$2.3 million. More education pays a sizeable economic return for going to college and earning at least a two-year or four-year degree. The 33 percent of Bachelor's degree holders that continue on to graduate and professional schools have even a more prosperous future ahead. Moreover, the difference in earnings between those who go to college and those who don't is growing- meaning that postsecondary education is more important than ever. More highly-educated people usually earn considerably more than their less-educated counterparts in the same occupation.<sup>66</sup>

<sup>64</sup> "Help Wanted, Projections of Jobs and Education Requirements Through 2018" by Georgetown University, Center on Education and the Workforce, June 2010

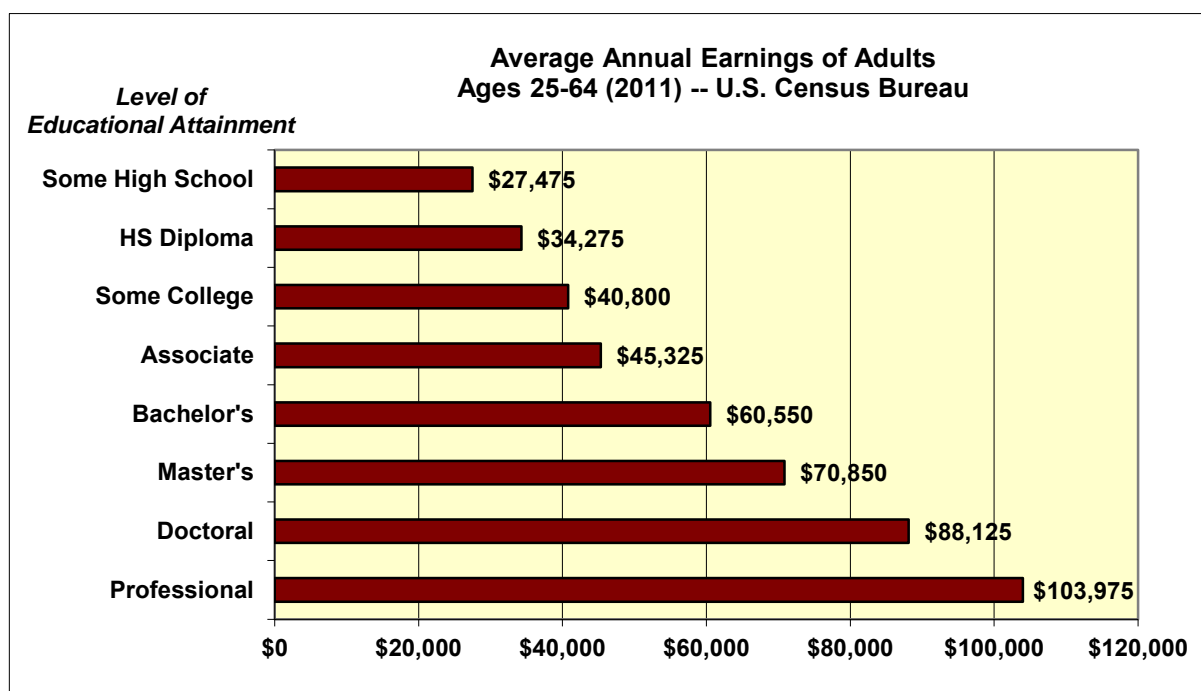

<sup>65</sup> "One More Time: Yes, College Is Worth It" by Kayla Webley, Time, August 16, 2012

"The College Advantage: Weathering The Economic Storm" by Anthony P. Carnevale, Tamara Jayasundera, Ban Cheah, Georgetown University, Center on Education and the Workforce, August 15, 2012, p. 4, 6, 12, 29

<sup>66</sup> "The College Payoff" Center of Education and the Workforce, Georgetown University, August 5, 2011

In addition, college graduates have suffered far fewer job losses during the global economic crisis than those who left school without qualifications.<sup>67</sup> In a tight economy, students and their families are likely to focus more on affordability and less on finding just the right college for a student academically, socially, and culturally.<sup>68</sup>

The chart below shows the average annual earnings of adults ages 25 or older by educational attainment according to U. S. Census Bureau figures. In 2011, a person who had earned a bachelor’s degree earned 1.76 times as much as did a high school graduate. A college degree continues to be one of the best ways for individuals to increase their annual earnings.<sup>69</sup>

Family income rises with the educational attainment of the householder. In 2011, for those with a bachelor’s degree or more, median income was \$60,550 compared to \$34,275 for those with a high school diploma and no college education, and \$27,475 for those with less than a high school diploma.

More than ever, education pays. Adults with high school diplomas or GED credentials in 2011 earned 46 percent more than those with no high school attendance and 25 percent more than those who attended high school but did not earn diplomas or GED credentials. Those with associate’s degrees earned 32 percent more than those with high school-level credentials. Those with bachelor’s degrees earned 77 percent more. And, those with professional degrees in fields such as law and medicine earned 72 percent more than those with bachelor’s degrees.

<sup>67</sup> “Education: crisis reinforces importance of a good education” OECD, Organization for Economic Co-operation and Development, September 13, 2011

<sup>68</sup> “The College Completion Agenda 2011, Keep College Affordable” by John Michael Lee Jr., College Board Advocacy and Policy Center, October, 2011

<sup>69</sup> “Work-Life Earnings for Full-Time, Year-Round Workers Aged 25-64 by Educational Attainment ” by U.S. Census Bureau, 2011 American Community Survey, October 2012, Table 1

The College Board calculated the estimated cumulative earnings of both high school and college graduates and found that the typical college graduate on average, each year of education and each credential add measurably to an individual's earnings. During their working lives, typical college graduates earn significantly more than the typical high school graduates, and those with advanced degrees earn two to three times as much as high school graduates. Compared to a high school graduate, the median four-year college graduate who enrolls at age 18 and graduates in four years expect to earn enough by age 36 to compensate for being out of the labor force for four years and for borrowing the full amount required to pay tuition and fees without any grant assistance.<sup>70</sup>

### Estimated Cumulative Earnings Net of Loan Repayment for Tuition and Fees, by Education Level

Data Source: U. S. Census Bureau 2012 and The College Board

Individual students and their families reap much of the benefit of higher education. For members of all demographic groups, average earnings increase measurably with higher levels of education. During their working lives, typical college graduates earn 62 percent more than typical high school graduates, and those with advanced degrees earn two or three times as much as high school graduates. Salaries are not the only form of compensation correlated with education level; college graduates are more likely than other employees to enjoy employer-provided health and pension benefits. These economic returns make financing a college education a good investment.<sup>71</sup>

<sup>70</sup> "Education Pays 2013: The Benefits of Higher Education for Individuals and Society," by The College Board, October 2013, p. 13.

<sup>71</sup> "Education Pays 2013: The Benefits of Higher Education for Individuals and Society," by The College Board, October 2013, p. 11.

Society as a whole also enjoys a financial return on the investment in higher education. Some advantages are immediate while others pay off over the longer term. In addition to widespread productivity increases, the higher earnings of educated workers generate higher tax payments at the local, state, and federal levels. Consistent productive employment reduces dependence on public income-transfer programs and all workers, regardless of education level, earn more when there are more college graduates in the labor force.<sup>72</sup>

Beyond the economic returns to individuals and to society as a whole, higher education improves the quality of life in many ways. It reduced poverty increases material standards of living and improves the overall well-being of the population; the psychological implications of unemployment are also significant. In addition to their non-monetary benefits, poverty and unemployment affect spending on public assistance programs. Moreover, adults with higher levels of education are more likely to engage in organized volunteer work, to vote, and to donate blood; they are also more likely than others to live healthy lifestyles. College-educated adults are more likely than others to be open to differing views of others, and the young children of adults with higher levels of education have higher cognitive skills and engage in more extracurricular, cultural, athletic, and religious activities than other children. In other words, participation in postsecondary education improves the quality of civil society.<sup>73</sup>

A study by the Georgetown University Center on Education and the Workforce confirms that the value of college degrees is increasing. By 2018, 63 percent of U.S. jobs will require some form of postsecondary education or training. Today, approximately 41 percent of adults have a college degree in America. Postsecondary education has become the new gateway to the middle class and the upper class, and one of the most important economic issues of our time. It makes education one of the most critical factors in our nation's long-term economic growth plans. A dramatic increase in educational attainment must become a top national priority. Lumina Foundation calling on leaders in business, education, government and civic engagement to embrace national initiative called Goal 2025 to increase the percentage of Americans with high-quality degrees and credentials to 60 percent by the year 2025 in order to make America the leader in education attainment in the world.<sup>74</sup>

The key to evaluating education's worth is looking at its value over a lifetime. College degree holders will earn an average of 74 percent more over the course of their lifetime. A college graduate's degree provides the power to leverage personal worth and protect themselves during poor economic times. During one of the worse economic periods our country has witnessed, while the country's average unemployment rate was more than 9 percent, individuals with a bachelor's degree were significantly lower, around four percent. Education is worth the cost, time, and investment. To obtain top-quality education and degree will open the doors to a successful and fulfilling professional career. Our economic destiny is determined through higher education.<sup>75</sup>

## Conclusions

There is no better investment in our state's future than higher education. Maintaining a top-quality higher education system, while keeping it affordable, is the top priority for our state. The Oklahoma State Regents for Higher Education are committed to providing students with access to a top-quality education opportunity at a very affordable cost. They have demonstrated this commitment by implementing only moderate increases in the cost of tuition at all State System institutions for the FY14. The Oklahoma State System of Higher Education has developed cost-saving initiatives that will result in actual and projected savings totaling \$411 million from 2009 to 2014.

Oklahoma public higher education institutions continue to be ranked among the most affordable in the nation. The U.S. Chamber of Commerce ranked Oklahoma Higher Education 7<sup>th</sup> in affordability, 8<sup>th</sup> in efficiency, and 16<sup>th</sup> in STEM job growth nationally. The University of Oklahoma and Oklahoma State University continue to remain at the bottom of the Big Twelve public institutions and the state's regional universities and community colleges are well below their peers for tuition and mandatory fee costs as prescribed by state law. The average cost of tuition and mandatory fees at Oklahoma higher education institutions is only 73.2 percent of the average legislative peer limit.

College affordability is essential, and Oklahoma's Promise scholarship program is considered to be one of the most successful college access programs in the nation. The state system invests heavily in total student financial aid, devoting \$267 million in total expenditures to student assistance in FY14, a 33 percent increase over five years ago. Students have opportunities to take full advantage of all available financial aid. Budgeted tuition waivers for FY14 increased by over \$4.17 million (8.0 percent) over FY13. A dedicated revenue source in state appropriations has been secured to meet the demand for State Regents' *Oklahoma's Promise (OHLAP)* scholarship commitments. Financial aid is readily available for those who need financial assistance in order to meet the costs associated with pursuing a college degree.

Oklahoma's public colleges and universities are producing more college graduates regardless of the economic downturn in recent years. As for Fall 2013, Oklahoma enrollment has increased by more than 14,000 students since 2008. Preliminary enrollment data indicates a slight decrease of 2.6 percent in headcount enrollment for the Fall 2013 semester after record levels of enrollment in 2010-11. The slight enrollment increases were seen at the research universities, an increase of 123 students, a 0.2 percent increase in 2013. Preliminary data for the *2011-12 Annual Report* projects that high school graduation rates will begin a consistent decline in 2012, which may have an impact on future college enrollment.

Administrators are committed to maintaining a standard of excellence in instructional and student service areas by monitoring and reducing operational costs as needed while addressing the challenges of increased mandatory costs and rising tuition. Institutions are proactive in their interactions with students and other constituencies resulting in students being more informed and presidents, institutions and local governing boards being more accountable and focusing on institutional differentiation to meet the needs of the community. They continue to explore new programs and grant possibilities to assist in providing additional revenue for institutions and implementing scholarship programs to assist eligible students with the additional costs of attendance.

The estimated return on investment for Oklahoma public higher education is \$4.72 for every \$1 of state funding. State appropriated income increased \$33.3 million (3.5 percent) in FY14 which lead to a moderate increase of tuition and mandatory fees of 4.7 percent in FY14 compared to 5.2 percent in FY13. State appropriations support decreased from 62.3 percent in FY01 to 39.3 percent of total operating budget revenues in FY14. Student revenues increased from 24.6 percent in FY01 to 45.8 percent in FY14.

State leaders communicated moderation in tuition increases while Oklahoma higher education institutions continue to strive to keep tuition affordable and accessible as well as to meet the primary goal of providing a quality educational experience for students, and working to improve graduation and retention rates. Oklahoma has committed to significantly increase the number of students successfully completing college to fuel a strong economy by helping more Oklahomans achieve their dream of a college education. Oklahoma's goal is to increase annual degree's earned to 20,400 students, or 67 percent increase, from 30,500 in year 2011 to 50,900 in year 2023.

Earning a college degree significantly increases an individual's earning potential as well as improves the quality of life. A college degree provides greater career mobility opportunities, greater lifetime earning power, and a more promising future. Higher education brings substantial benefits individually and collectively across the economy and society. Achieving higher education in Oklahoma brings financial benefits in terms of income and employment benefit levels come with greater job satisfaction, health, and longevity. Government, industry and society benefit from those achieving higher education through economic productivity, economic growth and government revenues.

Furthermore, society benefits by having well educated populace in terms of civic engagement and political involvement. Economic performances are linked to research performance in the modern innovation-based economy. Oklahoma State System institutions are at the forefront in the performance of research it contains outstanding performers in science and engineering. The research base in Oklahoma has been growing at a pace faster than that for the nation as a whole. The expenditures of the Oklahoma public higher education system generate \$9.2 billion in economic output impacts in the state and support more than 85,000 Oklahoma jobs.

Oklahoma students, institutions and state leaders are working together to offer quality higher education in the most cost-effective manner. These investments are being made because we understand that a highly educated workforce is critical to Oklahoma's future. These increases are certainly attainable, but only if we continue to invest in higher education, an investment that benefits the individual and our state. Higher education is also critical to success in the global economy.

The focus on higher education has reaped large dividends for the country. If we want America continue to be world leader in the 21<sup>st</sup> century, we must commit to helping generations continued to have access to quality education. Higher education has contributed immeasurably to America's culture of freedom and, more generally, to human flourishing. It has been a powerful economic engine promoting rising levels of prosperity. In today's global economy, it is imperative to have an educated and skilled workforce, and Oklahoma's State System of Higher Education is committed to this priority.

## **PUBLIC HEARING NOTICE**

### **TUITION PEER LIMITS AND ACADEMIC SERVICES FEES Effective Academic Year 2013-2014**

The Oklahoma State Regents for Higher Education will conduct a public hearing for the purpose of receiving views and comments on the subject of tuition peer limits and academic services fees charged students as a condition for enrollment at institutions in The Oklahoma State System of Higher Education. The hearing will be held in the State Regents' Conference Room on the second floor of 655 Research Parkway, Oklahoma City, Oklahoma on Thursday, April 18, 2013 at 9:00 a.m.

The following will be presented for comment:

- Tuition and mandatory fee limits for undergraduate and graduate programs;
- Tuition and mandatory fee limits for professional programs;
- Academic service fee proposals.

Those desiring to be heard should notify the Chancellor's Office of the State Regents by 5:00 p.m. on Friday, April 12, 2013 at 655 Research Parkway, Suite 200, Oklahoma City, Oklahoma, 73104, or by phone at (405) 225-9116.

Oklahoma State Regents for Higher Education  
**TUITION AND FEE APPROVAL GUIDELINES**  
**Fiscal Year 2013**

**Responsibility to Establish Tuition and Fees.** The Oklahoma Constitution, statutes, and State Regents for Higher Education policy confer responsibility for the establishment of tuition and fees at institutions in The Oklahoma State System of Higher Education at four levels: 1) Presidents of institutions analyze the need for resources to ensure the quality and availability of higher education offerings, balanced by students' needs and ability to pay, and propose tuition and fees to their respective governing board; 2) Governing boards review presidents' proposals and make a recommendation to the State Regents for Higher Education; 3) the State Regents for Higher Education review governing boards' recommendations, approve tuition and fees within legislatively prescribed statutory limits, and report to the Legislature annually their actions; and 4) the Legislature reviews State Regents for Higher Education actions.

**Publication of Peer Information for Planning Purposes.** Pursuant to 70 O. S. 2004 Supp., Section 3218.8, tuition and mandatory fees at public higher education institutions in Oklahoma will be compared to tuition and mandatory fees at peer (i.e., like-type) institutions in other states. State Regents will annually monitor and publish tuition and mandatory fees at peer institutions. Published in a timely fashion, the information will show the level of tuition and mandatory fees at each institution in Oklahoma compared to the legislative peer limit and the maximum possible dollar and percentage increase for the next academic year.

**Compliance with Legislative Peer Limits.** The Oklahoma Constitution authorizes the Oklahoma State Regents for Higher Education to establish tuition and mandatory fees within limits prescribed by the Legislature. At the research institutions, resident undergraduate tuition and mandatory fees must be at levels less than the average resident tuition and mandatory fee rates charged at public institutions in the Big Twelve Conference. At the regional and community colleges, resident undergraduate tuition and mandatory fee rates must be at levels less than the average tuition and mandatory fee rates charged at like-type institutions in surrounding and other states. Nonresident undergraduate tuition and mandatory fee rates must be at levels less than 105 percent of the average nonresident tuition and mandatory fee rates charged at their respective peer institutions. For graduate and professional programs, resident and nonresident tuition and mandatory fee rates shall remain less than the average tuition and mandatory fee rates at like-type graduate and professional programs.

**Establishment of Guaranteed Tuition Rates.** House Bill 2103 passed during the 2007 legislative session authorized the State Regents to establish a guaranteed tuition rate program for first-time, full-time resident students beginning with the FY2008-09 academic year. Students will have the option to participate in the guaranteed tuition rate or the non-guaranteed tuition rate at the time of first enrollment and will be guaranteed this rate for four years, or the normal time-to-completion of the program as determined by the institution. Each institution shall provide the students with the annual non-guaranteed tuition rate charged and the percentage increase that it would have to increase to equal or exceed the guaranteed tuition rate for the succeeding four years. The guaranteed rate shall not exceed 115 percent of the non-guaranteed tuition rate charged to students at the same institution.

*(FY14 Tuition and Fee Approval Guidelines -- Continued)*

**Communication Between State Regents and Students.** Staff of the State Regents for Higher Education will assist in the preparation and dissemination of guidelines for students and student groups to inform themselves about the process and issues and to provide input both at the campus level and to the State Regents for Higher Education. The State Regents for Higher Education will hold a public hearing on proposed changes in tuition and fees at least 20 days prior to the date the change becomes effective. For changes effective for the 2013 fall semester, the hearing took place at the State Regents for Higher Education office in Oklahoma City, Oklahoma on Thursday, April 18, 2013. The State Regents for Higher Education will maintain and publish a record of testimony by students and other participants who appeared at this public hearing.

**Guidelines to Institutions and Governing Boards.** Each institutional request for tuition and mandatory fees should be accompanied by documentation on the following items:

- 1) Communication of the tuition and mandatory fee request to student government organizations, other student groups, and students at large;
- 2) Efforts to increase need-based financial aid proportionately to tuition and fee increases;
- 3) Analysis of the expected effect of tuition and mandatory fee increases on the ability of students to meet the cost of attendance;
- 4) Analysis of the expected effect of tuition and mandatory fee increases on enrollment;
- 5) Detailed justification for all tuition and mandatory fee increases in excess of nine percent (9%); and
- 6) Dedication to cost-effectiveness in institutional operations.

**Use of Revenue from Dedicated Fees.** Institutions that charge students' academic services fees, i.e. special fees for library materials and services, classroom and laboratory materials, technology, etc., must ensure that 1) the revenues are spent for the approved purpose of the fee and 2) that these fees must not exceed the cost of providing the service. Likewise, to the extent possible, traditional E&G support for the above and similar purposes should not be diminished as a result of student fee revenue. Requests for new fees or increases to existing fees will be thoroughly reviewed to ensure 1) that the fees are required to meet specific costs and 2) that they are not requested to obscure, in essence, a tuition increase. According to existing policy, institutions submit requests related to academic services fees to the State Regents for Higher Education by February 1 of the year prior to the effective date of the fee request.

OKLAHOMA STATE REGENTS FOR HIGHER EDUCATION  
Research Park, Oklahoma City

**PUBLIC HEARING  
On Tuition and Fees**

Thursday, April 18, 2013  
State Regents' Conference Room

**Regent Ike Glass:** Thank you. We have several speakers who have asked to provide public comments and testimony on these topics. We thank you for your interest and appreciate your willingness to engage in public policy discussions. Our ground rules are: 1) you'll have three minutes for comments and Raquel [Schmitz] will tell you when your time is up; 2) this is a public hearing on the topic of tuition and fees and we ask that all speakers confine their comments to this topic; 3) if speakers have written comments or materials they would like to submit at the end of the comments or at the end of the meeting, please give them to Raquel.

The first speaker is Dr. Maier.

**Dr. Steven Maier:** Thank you. Yes, I'm Steven Maier from Northwestern Oklahoma State University. Thank you for this opportunity to provide input at the annual tuition hearing. Again, my name is Steven Maier and I served as chair of the Faculty Advisory Council from January to March of this year. I'm a full time faculty member at Northwestern Oklahoma State University and have been since 1998. On behalf of the Council we commend Chancellor Johnson, the Regents, and support personnel for their leadership, commitment, and diligence for their efforts. In particular, we'd like to acknowledge reporting the merits and importance of higher education in a manner that's professional, comprehensive, and we'd also like to acknowledge your being responsive to the needs of institutions of higher education and the students they serve.

The Council remains convinced that higher education is a necessary and critical component to the welfare of the state's economy and to its future success. Therefore, we place fostering the capabilities and promise of our graduates as a top priority among our roles as educators in the state. However, the effects of financial fatigue are now challenging our efforts. In some ways this fatigue has grown slowly over recent years. Increasing student-faculty ratios, fewer new hires, and modest to non-existent salary raises are a few of the examples. The bottom line results of continued reductions in financial support are many-fold. Fewer resources available to effectively accomplish the missions of our institutions, quality of courses marginalized by increasing student-to-faculty ratios, extending the time required for students to complete their undergraduate degrees, and diminishing incentives for faculty to remain in Oklahoma's higher education system. Two indicators of these negative impacts include faculty teaching beyond their areas of expertise to meet program requirements and very real crises concerning institutions' abilities to hire, fully utilize, and maintain qualified adjunct and full-time faculty.

With impending debt service burdens looming and the uncertainty regarding state appropriations, institutions are likely drafting budget scenarios to glimpse what their fiscal futures might hold. It is unlikely that a single, straightforward solution will present itself. As a part of the solution, the Council is supportive of permitting responsible student tuition increases as a means for our institutions to maintain operations. We do not wish for the entire burden of difficult financial times to fall on the students, but we feel revenue from tuition is an important variable in the overall solution. Like our institutions' administrators and members of the Oklahoma State Regents for Higher Education, we see great potential in our state's higher education programs. We want to pursue those potentials and be a part of growth for our state; however, continued reductions in financial support without providing institutions the means to recover costs undermine our efforts, as well as long-term goals such as Complete College America.

Again, we thank you, and thank you very much. We appreciate your willingness to hear our voice at this meeting.

**Glass:** Scott Chance.

**Scott Chance:** First I want to say thank you, Chancellor Johnson, as well as the rest of the State Regents here. I come before you today as a student from the University of Central Oklahoma, but I also come to you as the governor of the Oklahoma Intercollegiate Legislature. That's a unique opportunity for me because I don't just represent the University of Central Oklahoma—I represent all twelve institutions of higher education that are involved this semester with the Oklahoma Intercollegiate Legislature. I want to begin by saying that increasing tuition costs and mandatory fees is shown by other states as the number one way to look at the middle class and out-of-state students and tell them that we can't afford to invest in your future. As a member of the Oklahoma Intercollegiate Legislature and dealing with delegates, we are uniquely situated to know about the legislative process. So, let's look at the reality.

The reality is: the Oklahoma State Regents for Higher Education have done an incredible job fighting in the trenches to keep Oklahoma in the top ten in affordability and efficiency. This is a true testament to your leadership. With the average national published rate for 2012-2013 tuition and mandatory fees at \$8,655 for undergraduate resident students at four-year institutions and here in Oklahoma at \$5,381.02 (coming from the 2012 Tuition Impact Report), that is another testament to your leadership in providing a strong higher education system here in Oklahoma. With these facts, combined with the great programs and innovations coming from our institutions, we see that higher ed is something to be proud of in Oklahoma, and I can personally be proud of graduating with my bachelors in public administration this fall from UCO, which has only been possible with your work to make sure a college degree is accessible to anyone with a dream and a good work ethic. With that, I will wrap up and thank you so much again for letting me represent UCO and the Oklahoma Intercollegiate Legislature today. I commend you on your work and would yield the rest of my time to questions, if you have any.

**Regent Jody Parker:** How is it that the folks you represent are aware of our relative standing regarding tuition and fees on a national basis? Is there a way in which that is communicated?

**Chance:** The current way is that I made sure and told everyone that I was coming today and I asked for feedback. I don't want to come up here representing an organization and say what I think. I want to at least have what the delegates of my organization think. I think that is true servant-leadership.

**Glass:** Thank you, Scott. Ms. Sarah Meshburn.

**Sarah Meshburn:** Good morning. My name is Sarah Meshburn. I am currently a senior at the University of Central Oklahoma and I am also the current vice chair for the student congress at the University of Central Oklahoma. My journey so far in college has been a little different from my peers here. I am a transfer student from South Carolina. I remember whenever searching for colleges/universities to attend, UCO really caught my eye because of the value of education that they provide at such an affordable cost. As Chancellor Johnson mentioned, Oklahoma ranks seventh in the nation for affordability, and that is awesome. It wouldn't be available without the fight you provide at the state level for students, so I thank you for that. I know that at the University of Central Oklahoma one of our strategic themes is value. UCO provides a quality, transformative academic experience to a regional population at a reasonable cost. I firmly agree with this. I think it's awesome. In talking with other students who attend UCO as well, even international students, they've mentioned to me several times that one of the reasons they are able to continue their education at UCO is the affordability compared to other institutions out of state. It is very, very reasonable. Again, I thank you for the support and dedication that you offer to students and that you keep in mind the value of education. I know the return-on-investment for higher education is very high here due to the economy. As a student, our return-on-investment is finding the job after we graduate. Thanks to the economy and affordable education, we are able to. I'd like to yield the remainder of my time to questions.

**Glass:** Thank you very much. Jason Robson.

**Jason Robson:** Thank you, Regents and Chancellor Johnson, again for having me and my colleagues here. My name is Jason Robson. I'm a graduate student studying public administration at the University of Central Oklahoma. I'm the chairman of the student congress up in Edmond. To provide a new and different perspective, I did my undergraduate degree at the University of Oklahoma, where I got my degree in political science, and then wanted to continue my education and came to UCO. I am completing my degree, a masters in public administration—a newly formed degree there. Just speaking from my own perspective, your continued advocacy in keeping the cost of tuition and fees low has enabled me to continue my education so that my overall student debt isn't as high as it could possibly be. As a graduate student, I'm not qualifying for various federal grants and Pell grants that undergraduate students are allowed to get, so continuing my education in this aspect has allowed me to further myself. In fact, I intend to continue on as a PhD student as I have been accepted to a number of institutions recently. Thanks to your continued advocacy, it has allowed me to continue that educational aspiration.

You've heard all of the different statistics. I know for myself at the University of Central Oklahoma, Chancellor Johnson gave a similar presentation in December, which was quite enlightening. With that, I'd rather take any question that you may have for me.

**Regent Mike Turpen:** Any student loans along the way?

**Robson:** No, actually I've been able to have various jobs in addition to financial support from my parents, which has probably put them more into debt than me. Luckily I've been able to keep my overall costs low, so I haven't had to have any loan debt.

**Parker:** What do you anticipate the doctoral programs to cost?

**Robson:** Again, I am still weighing the options and costs, but I am hopeful that the assistantships they provide as well as tuition waivers will keep the overall costs low.

**Chancellor Glen D. Johnson:** As you made the decision for graduate work, tell us why you chose UCO.

**Robson:** Frankly it was the public administration program. After talking to various peers of mine and professors there, it became a passion of mine. I love my first alma mater, OU, but I wanted to expand my network and have another institution under my belt. So I am proud to be a Broncho today.

**Glass:** Thank you very much. Again, the State Regents want to thank all of the individuals who testified before us today. All written and oral commentary received today as well as commentary received via mail and electronic mail in the State Regents' office will be assembled to provide to all State Regents.

## **APPENDIX**

### **Constitutional and Statutory Provisions for the Coordination of Higher Education Tuition and Fees**

Article XIII-A of the Constitution of the State of Oklahoma establishes the Oklahoma State Regents for Higher Education as the coordinating board of control for all public institutions in The Oklahoma State System of Higher Education. Among others, specific powers enumerated include the power to prescribe and coordinate student fees and tuition within limits prescribed by the Legislature.

70 O.S. 2004 Supp., Section 3218.8, specifies the statutory limits and emphasizes the role of institutional governing boards in the establishment of tuition. This authorizes the State Regents to establish resident tuition and mandatory fees at levels less than the average rate charged at public institutions in the Big Twelve Conference for research universities, and less than the average rate charged at peer institutions for regional universities and community colleges. In addition, it authorizes institutions to offer a guaranteed tuition rate, not to exceed 115 percent of the nonguaranteed tuition rate, to full-time resident students enrolling for the first time.

Further, the State Regents are authorized to establish academic services fees, not to exceed the cost of the actual services provided, and are required to report annually to the Governor and Legislative leadership the impact of changes to tuition and fees. It also stipulates that the State Regents will make a reasonable effort to increase need-based financial aid available to students proportionate to any increase in tuition.
